SUNDAY CONFAB PROVES FUTILE

Plan of Minority Candidates Countered by McAdoo.

RALLY OF McADOO DELEGATES

W. J. Bryan Answers Critics In Conference of Minority Representatives—Governor Smith Signed Minority Proposal to Release Delegates From Pledges—Division of Ohio Delegates on 74th Ballot.

New York, July 7.—When the Democratic national convention reassembled Monday it could not be seen that there was much relaxation from the tense strain prevailing when the delegates most willingly voted to recess over Sunday at the end of the 77th futile ballot Saturday afternoon.

Sunday's conference of personal representatives of convention candidates resulted in an agreement in behalf of 15 of the "minority" candidates releasing them from all pledges or instructions. This agreement was signed by Governor Alfred E. Smith in person and by representatives of 14 other "favorite sons"; but it was countered by a proposal from the McAdoo forces that the unit rule and two-thirds rule be abrogated, each delegate be permitted to cast his pro-rata vote of his state delegation should any delegates be absent, and that the lowest candidate on each ballot be eliminated.

McAdoo delegates had a rally last night at their headquarters at which speakers declared there would be "no surrender" until McAdoo is nominated.

Mr. McAdoo spent most of his time Sunday in consultation with his convention manager, David L. Rockwell of Ohio, and the McAdoo forces entered the Garden this morning with determination evident in their faces.

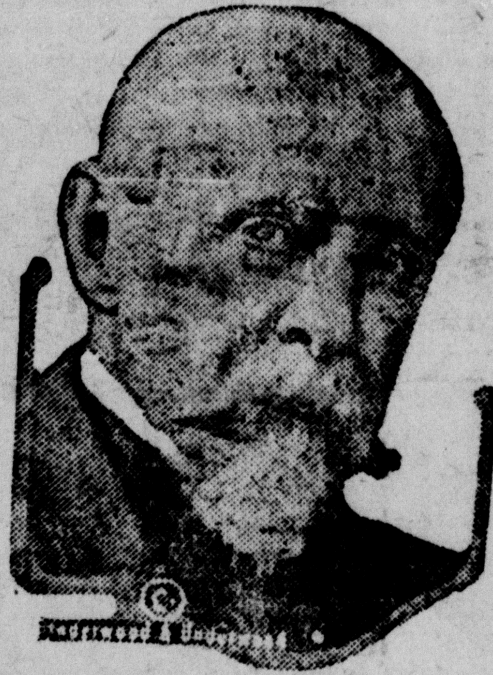

In the preliminary stages of the conference a controversy was precipitated by a proposal that the unit rule be abrogated so that all delegates could vote their personal convictions. This was supported by the Smith forces and opposed by William J. Bryan. Clashes occurred between Mr. Bryan and Senator Caraway of Arkansas, representing Senator Robinson. The activities of Mr. Bryan in this and previous conventions became the subject of frequent jibes, to which he replied in detail.

In the conference committee which considered the prospects of the various candidates over Sunday were the following: For Smith, Franklin D. Roosevelt, Norman E. Mack and J. J. Hoey, New York; J. H. McCooy, Brooklyn, and George E. Brennan and Thomas Lynch, Illinois. For McAdoo, David Rockwell, Ohio; J. Bruce Kremer, Montana; Daniel C. Roper, North Carolina; Homer S. Cummings, Connecticut; William L. O'Connell, Illinois; Arthur Mullen, Nebraska, and Thomas L. C. Chadbourn, New York. For Underwood, C. C. Carlin, Virginia; W. R. Pattengall, Maine; Walter Moore and Forney Johnston, Alabama. For Joseph T. Robinson, Senator Thaddeus H. Caraway, Arkansas. For Willard Saulsbury, Senator Thomas F. Bayard, Delaware. For David F. Houston, Lewis G. Stevenson, Illinois; Francis G. Caffey and Earl Harding. For Samuel M. Ralston, Thomas Taggart, Indiana. For Jonathan M. Davis, Frederick Robertson, Kansas. For Albert C. Ritchie, Howard Bruce and E. Brooks Lee, Maryland. For Woodbridge N. Ferris, William A. Comstock, Michigan. For James M. Cox, J. Henry Goeke and Charles E. Morris, Ohio. For Charles W. Bryan, William Jennings Bryan, Florida, and T. S. Allen, Nebraska. For Fred H. Brown, Robert Jackson, New Hampshire. For George Silzer, James Kerney and Mayor Frank Hague, Jersey City, N. J. For Carter Glass, Senator Claude Swanson, H. F. Byrd, Virginia, and Henry C. Stuart. For John W. Davis, C. L. Shaver, West Virginia.

Not one Ohio delegate voted for McAdoo when the vote was split up on the 74th ballot. The delegation divided as follows: For Smith, Thomas J. Duffy, Edwin F. Peters, Vincent S. Beckman, John R. Quane, J. Spriggs McMahon, Warren Gard, Dan H. Kirwan, James R. Marker, Edward J. Lynch, John Sorenson, Louis Horowitz, Frank R. Gross, Louis J. Quinn, Wendell L. Wilkie, Elmer Cline, James Neville, E. H. Moore, Dennis F. Dunlavy, Charles Mooney, Pierce D. Metzger, Harry Fralich, W. B. Gogwer, for Underwood, Kearns Wright, John L. Zimmerman, M. R. Denver, M. A. Daugherty, Con Mulcahy, George White, Carroll Jackson, J. S. Anna L. Mulec; for Davis, J. E.

ALVEY A. ADEE

Lays Down Pen of Diplomacy After Long Service.

Campbell, J. H. Ceeke, C. C. Williams, Garrett S. Claypool, C. A. McCleary, Durbin Metz, Harry Gager, John T. Flynn, for Governor Bryan. Atlee Pomeroy, W. W. Durbin, R. E. Arnold; for Ralston, Judson Harmon, Mrs. Minnie Siddall, Mrs. Eleanor B. Johnson, G. B. Nye, Earl D. Bloom, A. J. McCullough; for Robinson, W. A. Sullivan, Charles V. Truax; for Glass, Newton Bronson, W. A. Inman, Newton D. Baker.

Makes No Comment.

Washington, July 7.—When Senator LaFollette was informed of his endorsement by the progressive conference as its candidate for president he had no comment to make. He was more intent on obtaining information of the steps taken by his supporters. He had advised the convention prior to its action that he would accept the candidacy.

Denied by Serrano.

Mexico City, July 7.—Secretary Serrano of the war department denied the report from Tampico that the department ordered occupation of the Mexican Eagle Oil company property by federal troops.

WITT TO HEAD OHIO CAMPAIGN

Cleveland Councilman Chairman of LaFollette Committee.

WILL PETITION FOR PLACE

Wisconsin Senator Has Practically Two Platforms Under His Independent Candidacy For President. Committee Will Choose His Running Mate—Organization of New Party Postponed Until January.

Cleveland, July 7.—Organizations to circulate LaFollette petitions, place his name on the ballot and work for his election, were started after adjournment of the convention, which placed the senator in nomination as an independent candidate for president.

Delegates chosen from many states met with Congressman John M. Nelson of Wisconsin, who is to be manager of the LaFollette campaign, for preliminary conference and organization plans.

At a meeting of 59 Ohio delegates Peter Witt of Cleveland was named state chairman; Miss Elizabeth Hauser of Girard, vice chairman; Rev. Herbert Bigelow of Cincinnati, secretary and treasurer.

The convention empowered its national committee to select a vice presidential candidate after conference with the national committee in charge of the LaFollette campaign.

No party name was adopted for the campaign, but provision was made for the organization of a new progressive political party next January, whatever the result of this year's presidential campaign may be.

Senator LaFollette is practically supported by two campaign platforms, his own, commonly known as the "Wisconsin platform," rejected at the recent Republican national convention; the other prepared by the conference for progressive political action and known as its "program of public service."

There was no conflict between the two, however; in fact, aside from verbiage, they were identical. Both conform to all of the LaFollette policies; both pledge decisive revision of existing measures of government.

The statement opening the preamble to the Wisconsin platform strikes the keynote of virtually every policy with which Senator LaFollette will face the country and reads: "The great issue before the American people today is the control of government and industry by private monopoly."

High lights of the two platforms pledge that LaFollette, if he is elected, will undertake:

Public ownership of railroads and the repeal of the Esch-Cummins railroad law.

Public ownership of the nation's water power and the creation of a national super power system, including Muscle Shoals.

Further reduction of the tax burden on small incomes, and the retention of all levies on "swollen incomes," excess profits, etc.

Drastic reduction of "exorbitant duties" on manufactures provided in the Fordney-McCumber tariff act.

Reconstruction of federal reserve and federal farm loan systems "to provide for direct public control of the nation's money and credit to make it available on fair terms to all."

Abolition of the injunction in labor disputes and recognition of the rights of farmer and laborer to organize and bargain collectively.

A foreign policy free from control by "financial imperialists, oil monopolists and international bankers;" revision of the treaty of Versailles in accordance with the terms of the armistice; promulgation of treaties for the abolition of war and the drastic reduction of armaments.

A "complete housecleaning" in the departments of interior and other executive departments.

Strict conservation and public control of all natural resources, including coal, iron and other ores, oil and timber lands, etc.

Aid to the farmer through enactment of legislation promoting and protecting co-operative enterprises and through reduction of freight rates on agricultural products.

A great waterway from the Great Lakes to the sea.
The adoption of such amendments to the federal constitution as may be necessary to provide for the direct nomination and election of the president, to extend initiative and referendum.

GASTON DOUMERGUE

President of France Has Brilliant Political Career.

dum to federal government and insure a popular referendum for or against war.

Adjusted compensation for world war veterans, to be paid for by taxes "laid upon wealth in proportion to ability to pay."

None of the purely political issues which confronted both the Republican and Democratic conventions entered into either platform. All attempts from the floor of the convention to include statements on those issues were overruled by the chair and by a majority of the delegates.

DOINGS IN OHIO

Situation Improving.

Sandusky, O., July 7.—Under an order issued Saturday state troops on duty here since Sunday, June 29, left here Monday morning. Police Chief Perry has arranged for detectives to do guard duty at night in their stead in the storm-swept area, which has been condensed until it is quite small. Mayor George Freitas has postponed issuing appeal for outside aid, pending conference with officials of the American Red Cross here Monday.

Was a Veteran.

Cleveland, July 7.—Robert H. Carlisle, 66, vice president of the Strong-Carlisle company, died here. He was born in Bedford and when 15 years old left home to join the Union army, the youngest member of the 15th Ohio infantry. After the war he went into business in Delaware and came to Cleveland in 1880.

Odd Fellows at Tiffin.

Tiffin, O., July 7.—Two thousand Odd Fellows are expected to attend the sessions here of the Patriarchs Militant, the uniformed branch of Odd Fellows. Preliminary work and committee meetings will take up the first two days. The first meeting of the grand encampment will be held July 8.

Skeletons Unearthed.

Cincinnati, July 7.—Skeletons of three Indians, together with necklace of copper beads, copper earrings, a copper pendant and other Indian relics, were found at Mariemont, near Madisonville. Officials at Mariemont await the arrival of an archaeologist to give a scientific explanation of the finds.

Club to Support White.

Columbus, July 7.—James A. White, Republican candidate for governor of Ohio, has accepted an invitation to be in Reynoldsburg July 11, at the home of L. A. Forester, to form a club favoring White for governor.

Injury Fatal.

Canton, O., July 7.—Wallace Ansley, 40, of Alliance, employed at the New York Central railroad yards in Mineral, died in a hospital here of a fractured skull received when struck by a derrick a week ago.

Burglarized and Burned.

Gallipolis, O., July 7.—William Tabet's grocery and three-story residence was burglarized and then set afire the total loss approximating \$10,000. Tabet's family escaped in their night clothing.

Trainman Killed.

Alliance, O., July 7.—J. R. Nielson, 30, of Mansfield, a Pennsylvania railway man, died in the city hospital here of injuries received when struck by a train near here.

Striking bakery workers in Paris, granted more pay, have returned to work. Price of bread is to be increased.

SPEAKS PRAISE FOR A. A. ADEE

Tribute of Secretary Hughes to Second Assistant.

DISTINGUISHED CAREER ENDED

From Legation Secretary at Madrid in 1870 Mr. Adey Rose to Position Held 38 Years—Had Reached Advanced Age When Life Expired. Was Recognized Authority on Diplomacy and Foreign Affairs.

Washington, July 7.—Secretary of State Charles E. Hughes paid this tribute to Alvey A. Adey, whose long service in the state department was ended by death:

"The death of Mr. Adey brings to an end a service which is unparalleled for its length and efficiency in the history of the department of state. He was a man of broad scholarship, rare diplomatic insight, and for intimate knowledge of our foreign relations easily held first place. During a long period and until his health failed, he was the constant and most trusted advisor of secretaries of state. It is not too much to say that the government has never had a more faithful and competent servant."

Alvey A. Adey, for many years second assistant secretary of state died at his home here, aged 81 years. He was born in Astoria, New York, November 27, 1842.

He had a continuous service in diplomacy, covering 54 years and he was conceded to have possessed the most intimate knowledge of any single individual as to diplomacy and foreign relations of the United States generally. He had the post of second assistant secretary 38 years.

Complications incident to advanced age caused his death. Owing to failing strength, he had been relieved of routine duties for several years and served as adviser extraordinary on all important questions affecting precedents, or diplomatic usage or custom.

During the war he studied new questions of policy and international diplomacy raised by the changing relations of the United States with belligerents. His first position in the diplomatic service was secretary of the legation in Madrid, in 1870. Following that he was charge d'affaires at different times and in 1882 became third assistant secretary of state. Since 1886 he was second assistant in that department. Because this place was nonpolitical, he chose to remain in it rather than accept the first assistant secretaryship, a political position.

His scope ranged from international law to photography and included a knowledge of many sciences. Although he never graduated from any law school, he frequently was consulted by lawyers who presided over the state department. He passed on every official note that left the department and thus placed the communication on a higher literary plane. It was a tradition of the state department that he wrote almost all of the Thanksgiving day proclamations.

BORAH WILLING TO INVESTIGATE

Wires Ansberry His Committee Will Act if It Has Authority.

Washington, July 7.—Senator William Borah of Idaho, chairman of the senate committee investigating campaign expenditures, replying to suggestions from T. T. Ansberry, delegate from Ohio at the Democratic convention, that expenditures in connection with the convention be investigated, wired:

"I doubt if the resolution under which the convention is authorized to act authorizes any investigation other than those which pertain to candidates after nomination. Wish you would consult Senators Caraway and Bayard in the convention and advise me as to their views. Jones and Shipstead are out of the city. If it appears that we have the authority and the facts at all justify, I will undertake to get the committee together."

United States destroyer Brooks, en route to Portsmouth, N. H., went aground on ledge off Newcastle harbor and was considerably damaged.

SICKENS OF HER WORK

Investigator Says That Many Men and Women Lead Dual Lives.

Youngstown, O., July 7.—In a statement by Miss Susie Knox, an investigator for the local court on domestic relations she asserts that an alarmingly large number of persons applying for divorces, with apparently clear-cut facts to substantiate their requests, are leading dual lives, which should net them prison terms instead of the decrees they seek.

She added that years of investigating the characters and modes of living of divorce seekers have sickened her of the work, and she plans to retire from it soon. "Some of my experiences have actually made me ill," she said. "I take them to heart and become excited over them. When I find men and women applying for divorces and then discover they are living with persons other than their husbands or wives, I can well understand why an investigating system is needed."

Miss Knox also says: "Too many men and women who seek to have divorce courts sever the matrimonial bonds they willingly assumed are living falsely, not only here, but all over the country."

Army Aviators Delayed.

Washington, July 7.—A delay of three days in the army around the world flight was necessitated by motor trouble, it was said in a dispatch received by General Patrick, chief of the air service, dated Karachi, July 4. The squadron left Multan July 3 and completed the leg in 7 hours and 10 minutes. "Nelson's motor went bad 70 miles out over the desert," the message said. "Landed safely. Changing motors in all planes. Plan departure the 7th."

Court Order Reversed.

Albany, N. Y., July 7.—An order of the lower court requiring the Anti-Saloon league of New York state to file a statement as a political committee of expenditures in connection with the election of 1920 was reversed by the court of appeals. The appellate court held there was evidence to sustain the finding that the league expended money to influence elections.

University President.

Austin, Tex., July 7.—Dr. Walter Splawn, member of the railroad commission of Texas, was named president of the University of Texas, effective Sept. 1. Dr. Herbert E. Bolton of the University of California, who was elected to the position several months ago, declined the proffer.

St. Louis Paper Quits.

St. Louis, July 7.—The St. Louis American, a morning newspaper, issued since May 23, has indefinitely suspended publication. It was announced that an attempt to revive the paper will be made in a month or so.

MARKET QUOTATIONS

LIVE STOCK AND MEATS—Chicago hog prices ranged 5c to 15c higher than a week ago, closing at \$7.30 for the top and \$6.60 for 15 for the bulk. Medium and good beef steers 35c to 50c higher at \$7.75 to \$8.00; butchers cows and heifers 25c to 50c up at \$5.65 to \$5.85; feeder steers 25c lower at \$5.60; veal calves \$1 to \$1.25 higher at \$8.75 to \$9.00; fat lambs \$1.25 up at \$12.75 to \$13.25; feeding lambs steady at \$10.25 to \$12; yearlings \$1 higher at \$9.75 to \$10.25; and ewes 25c higher at \$7.50 to \$8.00. In eastern wholesale fresh meat: Beef, \$13.40 to \$15.00; veal, \$12.40 to \$13.00; lamb, \$22.00 to \$24.00; mutton, \$11.15 to \$11.50; light pork chops, \$11.15 to \$11.50; heavy loins, \$11.15 to \$11.50.

GRAIN—Grain market lower at end of week. Quoted July 5: No. 1 dark northern spring wheat, Minneapolis \$1.27 1/2; No. 2 hard winter wheat, Chicago \$1.16 1/2; No. 2 red winter wheat, Chicago \$1.17 1/2; St. Louis \$1.18 1/2; No. 2 yellow corn, Chicago 95c; No. 3 yellow corn, Chicago 94c; No. 3 white corn, St. Louis \$1.04; Kansas City 96c; No. 3 white oats, Chicago 53c; No. 3 white oats, Chicago 53c; No. 3 white oats, Chicago 53c; No. 3 white oats, Chicago 53c.

DAIRY PRODUCTS—Butter markets featured by nervous unsettled feeling throughout the week, but closed firm. Closing wholesale prices, 92 score. New York and Boston 41c; Philadelphia 42c; Chicago 39c. Cheese markets firm under fairly active trading. Wholesale prices at Wisconsin primary markets July 5: Flats 18c; singles 19c; twins 18c; double daisies 18c; longhorns 18c; square prints 19c.

FRUITS AND VEGETABLES—North Carolina Irish cobbler potatoes declined in most markets, closing at \$3.40 per barrel. East shore Virginia stock 25c to 30c lower at \$3.50 to \$4 in leading cities. 35c lower at shipping points at \$3.35. Georgia peaches, carmans, medium to large sizes slightly stronger at \$3.50 to \$4.25 per six basket carrier in a few markets, best \$1.50 f. o. b.

HAY—Hay market continues seasonable dullness. Quoted July 5: No. 1 timothy, Foston \$2.2, New York \$3.0, Pittsburgh \$2.50, Cincinnati \$2.3, St. Louis \$2.50, Memphis \$2.7, Chicago \$2.50. Alfalfa \$2.90. No. 1 alfalfa, Kansas City \$1.75, Memphis \$2.5, Omaha \$1.50. No. 2 alfalfa, Kansas City \$1.2, Omaha \$1.50, St. Louis \$1.7, Chicago \$1.7.

Omitted Duty

Jefferson was no stoic. He said life, liberty and pursuit of happiness in that famous line, but nothing about duty.

The Billoville Auto

In spite of all the auto accidents, we must say a good word for the automobile, for we've made enough out of it in damages to enlarge the paper and buy two mules and a new piano.

Right Now—
PEARL for Screens!

RIGHT now you are beginning to think about screens—so now is the time to investigate G&B PEARL Wire Cloth—aristocrat of all screen materials. This material is the best wearing and best looking screen of its kind. It so far outlasts painted and galvanized cloths that there is no comparison.

The reason is simple. Rust, not wear ruins screens. G&B PEARL Wire Cloth is as near rust proof as metal can be made. That's the whole story. It requires no paint—no repairs and is the best looking material that ever screened a porch or door or window. Clean and sanitary, too.

There are lots of screens that look like PEARL but don't wear anywhere near the same. So—play safe—see us. We sell genuine G&B PEARL with the 2 Copper Wires in the Selvage and the G&B Round Tag on every roll.

Tibetan Women Smear Their Faces With Mud

Tibetan women are not particularly prepossessing, but this is in some measure due to the practice of smearing their faces with catch, nowadays with the object of securing protection from the high winds that blow on the Tibetan plateau. The origin of the custom was, however, quite different.

About 200 years ago, in the reign of the sixth Dalai Lama, that prelate's advisers were greatly shocked and alarmed by his amorous propensities. Being a high incarnate lama, he should have ignored the existence of women. His habit was, however, to go about Lhasa City at night, dallying with the pretty girls he met on his way.

To put a stop to this, the councilors issued orders that every woman should disfigure herself by smearing red earth on her face, and thereby render herself repulsive to the young Dalai Lama. Whether this ruse was successful is not known, but the practice has continued down to the present day.

The headresses of the women of the wealthier families are usually covered with large seed pearls and are sometimes worth as much as \$2,000.

Every Tibetan woman wears suspended round her neck by a string of pearls a "gow," or charm box.

This varies in size from that of a match-box to the dimensions of a fair-sized book, according to the circumstances of the wearer. It is usually coated with gold leaf and studded with precious stones.

These charm boxes are handed down from mother to daughter and, together with the headress, represent the savings of the family to which the wearer belongs.—Continental edition of London Mail.

Remarkable Demises

The ways in which application forms for insurance are filled up are often more amusing than enlightening, as the British Medical Journal shows in the following selection of examples:

"Mother died in infancy."

"Father went to bed feeling well, and the next morning woke up dead."

"Grandfather died suddenly at the age of 103. Up to this time he bade fair to reach a ripe old age."

"Applicant does not know anything about maternal posterity, except that they died at an advanced age."

"Applicant does not know cause of mother's death, but states that she fully recovered from her last illness."

"Applicant has never been fatally sick."

"Applicant's brother, who was an infant, died when he was a mere child."

"Grandfather died from gunshot wound, caused by an arrow shot by an Indian."

"Applicant's fraternal parents died when he was a child."

"Mother's last illness was caused from chronic rheumatism, but she was cured before death."—The Christian Advocate.

World's First Clock

In 1309 the first clock known to the world was placed in the tower of San Eustorgio, in Milan. In 1344 a clock was installed in the palaces of the nobles at Padua. This was a wonder of mechanism indeed, for, besides indicating the hours, it showed the course of the sun, the revolutions of the planets, the various phases of the moon, the months and the fetes of the year.

In 1420 an alarm clock made its appearance. The chroniclers have placed on record that this clock sounded a bell at a stated hour, and at the same time a little wax candle was lighted automatically. How this was done we are not told, but it must not be overlooked that until about a hundred years ago we had no means of obtaining light other than the tinder box.—Detroit News.

Need Sleep for Memory

Insufficient sleep causes impairment of memory, according to recent researches on the subject of sleep by Professors Engelen, Frerichs and Weygandt of Berlin, Germany. The memory becomes unreliable even if the shortage of sleep has occurred for only a short time. Eight hours is the average needed for sleep, but brain workers sometimes require more. A reduced period of slumber may be partly made up for by increased intensity, a short period of deep, undisturbed sleep having the same effect as a longer and lighter one.

The investigators also conclude that brain workers need a month of rest every year and that even longer vacations do not cause a lessening of acquired abilities, but rather an intensification of them.—Kansas City Star.

Probably Would

When a man gives a motor cop a tale of woe, the cop merely says: "Tell it to the judge."

But when a pretty girl gives the cop a dazzling smile, he doesn't advise her to try that on the judge.

He knows it would probably work.—Louisville Courier-Journal.

An Obliging Dentist

"What? Fifteen million marks to extract a tooth! I have to work an hour to earn that!"

"If you like I will spend an hour in extracting the tooth!"—Meggendorfer Blaetter, Munich.

Placing the Blame

Keen but Nervous Amateur—I say, old chap, what shall I do if they ask me to sing?

Candid Friend—Do? Why, sing, of course—it'll be their own fault!—The Humorist (London).

What Composes Agate.

Agate is a variety of quartz composed of successive layers of silica deposited from a silica-saturated water solution. Slight amount of impurities in the silica solution produces different colors in the agate, giving rise to banded agate, in which the successive layers are of different color; clouded agate, which has irregularly disposed patches of color, and moss agate, which contains sharply defined, moss-like, dark markings due to manganese oxide. Agates are found universally and are much used, when cut and polished, for ornaments and jewelry. The principal supply comes from Uruguay and Brazil, South America, whence they are sent to Oberstein, in Germany, where their polishing is an important industry.

Faust Was Magician.

Faust was a famous magician of the Sixteenth century, a native of Suabia. A rich uncle having left him a fortune, Faust ran to every excess and when his fortune was exhausted he made a pact with the devil for a certain number of years, at the end of which time the devil was to possess his soul. His sweetheart was Marguerite and Wagner his faithful servant. Gounod wrote the music for the opera called "Faust" and the libretto was composed by Berlioz and Carre. Goethe wrote a dramatic poem called "Faust," and Bayle Bernard made an English version.

VACATION APPAREL

All Aboard For Seaside!
Country Side And Lakeside!
All Aboard!

Happiest days of all the year--vacation time. Play hours in the glorious sunshine. Evenings out under the stars.

Coming vacation days are preparation days now. To answer the lure of mountainside, seaside, or lakeside correctly, your trunk must be packed with the right things.

Here again the helpfulness of this store asserts itself. Planning for your vacation days have gone on here for months and now stocks are complete with vacation apparel for every hour of the long play day.

FRIEDMAN'S

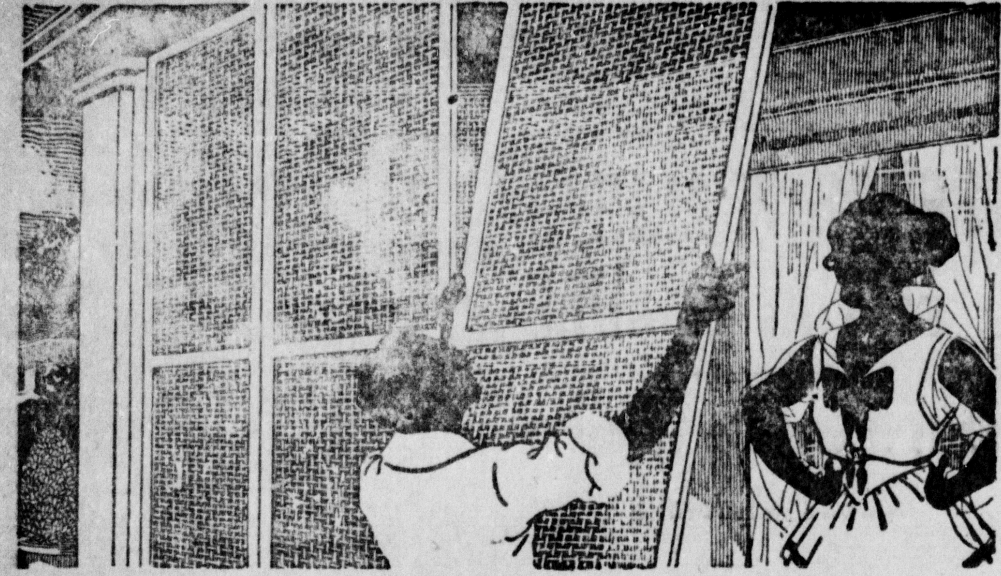

APPAREL FOR WOMEN

Omitted Duty

Jefferson was no stoic. He said life, liberty and pursuit of happiness in that famous line, but nothing about duty.

The Billville Auto

In spite of all the auto accidents, we must say a good word for the automobile, for we've made enough out of it in damages to enlarge the paper and buy two mules and a new piano.

Right Now— PEARL for Screens!

RIGHT now you are beginning to think about screens—so now is the time to investigate G&B PEARL Wire Cloth—aristocrat of all screen materials. This material is the best wearing and best looking screen of its kind. It so far outlasts painted and galvanized cloths that there is no comparison.

The reason is simple. Rust, not wear ruins screens. G&B PEARL Wire Cloth is as near rust proof as metal can be made. That's the whole story. It requires no paint—no repairs and is the best looking material that ever screened a porch or door or window. Clean and sanitary, too.

There are lots of screens that look like PEARL but don't wear anywhere near the same. So—play safe—see us. We sell genuine G&B PEARL with the 2 Copper Wires in the Selva and the G&B Round Tag on every roll.

Barrere & Nickerson,

Tibetan Women Smear Their Faces With Mud

Tibetan women are not particularly prepossessing, but this is in some measure due to the practice of smearing their faces with mud, nowadays with the object of securing protection from the high winds that blow on the Tibetan plateau. The origin of the custom was, however, quite different.

About 200 years ago, in the reign of the sixth Dalai Lama, that prelate's advisers were greatly shocked and alarmed by his amorous propensities. Being a high incarnate lama, he should have ignored the existence of women. His habit was, however, to go about Lhasa City at night, dallying with the pretty girls he met on his way.

To put a stop to this, the councilors issued orders that every woman should disfigure herself by smearing red earth on her face, and thereby render herself repulsive to the young Dalai Lama. Whether this ruse was successful is not known, but the practice has continued down to the present day.

The headresses of the women of the wealthier families are usually covered with large seed pearls and are sometimes worth as much as \$2,000.

Every Tibetan woman wears suspended round her neck by a string of pearls a "gow," or charm box.

This varies in size from that of a match-box to the dimensions of a fair-sized book, according to the circumstances of the wearer. It is usually coated with gold leaf and studded with precious stones.

These charm boxes are handed down from mother to daughter and, together with the headress, represent the savings of the family to which the wearer belongs.—Continental edition of London Mail.

Remarkable Demises

The ways in which application forms for insurance are filled up are often more amusing than enlightening, as the British Medical Journal shows in the following selection of examples:

"Mother died in infancy."
"Father went to bed feeling well, and the next morning woke up dead."
"Grandfather died suddenly at the age of 103. Up to this time he bade fair to reach a ripe old age."
"Applicant does not know anything about maternal posterity, except that they died at an advanced age."
"Applicant does not know cause of mother's death, but states that she fully recovered from her last illness."
"Applicant has never been fatally sick."

"Applicant's brother, who was an infant, died when he was a mere child."
"Grandfather died from gunshot wound, caused by an arrow shot by an Indian."
"Applicant's fraternal parents died when he was a child."
"Mother's last illness was caused from chronic rheumatism, but she was cured before death."—The Christian Advocate.

World's First Clock

In 1309 the first clock known to the world was placed in the tower of San Eustorgio, in Milan. In 1344 a clock was installed in the palaces of the nobles at Padua. This was a wonder of mechanism indeed, for, besides indicating the hours, it showed the course of the sun, the revolutions of the planets, the various phases of the moon, the months and the fetes of the year.

In 1420 an alarm clock made its appearance. The chroniclers have placed on record that this clock sounded a bell at a stated hour, and at the same time a little wax candle was lighted automatically. How this was done we are not told, but it must not be overlooked that until about a hundred years ago we had no means of obtaining light other than the tinder box.—Detroit News.

Need Sleep for Memory

Insufficient sleep causes impairment of memory, according to recent researches on the subject of sleep by Professors Engelen, Frerichs and Weygandt of Berlin, Germany. The memory becomes unreliable even if the shortage of sleep has occurred for only a short time. Eight hours is the average needed for sleep, but brain workers sometimes require more. A reduced period of slumber may be partly made up for by increased intensity, a short period of deep, undisturbed sleep having the same effect as a longer and lighter one.

The investigators also conclude that brain workers need a month of rest every year and that even longer vacations do not cause a lessening of acquired abilities, but rather an intensification of them.—Kansas City Star.

Probably Would

When a man gives a motor cop a tale of woe, the cop merely says: "Tell it to the judge."

But when a pretty girl gives the cop a dazzling smile, he doesn't advise her to try that on the judge.

He knows it would probably work.—Louisville Courier-Journal.

An Obliging Dentist

"What? Fifteen million marks to extract a tooth! I have to work an hour to earn that!"

"If you like I will spend an hour in extracting the tooth!"—Meggendorfer Blaetter, Munich.

Placing the Blame

Keen but Nervous Amateur—I say, old chap, what shall I do if they ask me to sing?

Candid Friend—Do? Why, sing, of course—it'll be their own fault!—The Humorist (London).

What Composes Agate.

Agate is a variety of quartz composed of successive layers of silica deposited from a silica-saturated water solution. Slight amount of impurities in the silica solution produces different colors in the agate, giving rise to banded agate, in which the successive layers are of different color, clouded agate, which has irregularly disposed patches of color, and moss agate, which contains sharply defined, moss-like, dark markings due to manganese oxide. Agates are found universally and are much used, when cut and polished, for ornaments and jewelry. The principal supply comes from Uruguay and Brazil, South America, whence they are sent to Oberstein, in Germany, where their polishing is an important industry.

Faust Was Magician.

Faust was a famous magician of the Sixteenth century, a native of Suabia. A rich uncle having left him a fortune, Faust ran to every excess and when his fortune was exhausted he made a pact with the devil for a certain number of years, at the end of which time the devil was to possess his soul. His sweetheart was Marguerite and Wagner his faithful servant. Gounod wrote the music for the opera "Faust" and the libretto was composed by Berlioz and Carre. Goethe wrote a dramatic poem called "Faust," and Bayle Bernard made an English version.

HERRICK

REFRIGERATORS

HERRICK

DRY AIR SYSTEM

REFRIGERATOR

The Big Difference In Refrigerators

The main object of any refrigerator, of course, is the preservation of foods. The refrigerator that will keep foods in perfect condition longest is naturally the refrigerator you want—provided it doesn't increase your ice bills.

The Herrick answers those requirements with facts—not claims. And it does even more. It actually decreases your ice bills while giving you more effective food preservation.

And why? Simply because the Herrick is far more than an ice box—far more than a cold storage place. It is built on the scientifically demonstrated principle that more than merely cold air is necessary to keep foods in good condition for any great length of time.

Perhaps the biggest essentials to scientifically correct refrigeration are—

- No. 1. Circulation of cold dry air.
- No. 2. Effective Insulation.
- No. 3. Air-tight construction.

That the Herrick has these necessary essentials is a demonstrated fact.

Many proofs of the truth are visible even to the least informed purchaser. Others are hidden within the walls of the refrigerator, but nevertheless there, performing their functions so important to good health and economy.

HISTORICAL EVENTS

RECORDED ON ROPE

Quipu Invention Conveys

Ideas Used in Peru.

Most persons are familiar with representatives of the hieroglyphics of the ancient Egyptians. By means of the engraved marks found on the monuments and other records the old Egyptians could represent object ideas suggested by objects, and even sounds. This signifying of sounds by means of symbols formed nearly a true alphabet.

In Mexico the Aztecs had a crude system of picture writing by which sensible objects could be accurately depicted, but beyond that it could not go, for it was incompetent to convey abstract ideas.

Possibly the crudest invention of this sort was the mysterious science of the quipu, which was taught the Peruvian princes by their amautas, or "wise men." While both systems before mentioned seemed primitive this one is even more so, and yet it served a purpose, and a very good one, too.

This quipu was a string of rope usually about two feet in length, composed of many colored strings twisted together. To this main cord were fastened numbers of strings of different colors tied into knots, thus forming a fringe. These knots gave the device its name, for the word quipu signifies a "knot." The colors represented sensible objects. For example, white might stand for silver, and yellow for gold. Occasionally they suggested ideas abstractly—white signified peace and red war.

The chief use of the quipu was for arithmetical purposes. The knots took the place of ciphers and could be combined to represent numbers to any amount desired. The colors of the strings explained the subjects to which the numbers referred and in this way the Peruvians devised a complete system of enumeration. The Spaniards testified to the rapidity with which the Peruvian calculations were made.

It is easy to see how, with a corps of trained officials, such a system might be made to work effectually, but it is difficult to understand how historical events could be recorded and traditions preserved. For this purpose were employed interpreters of the quipu, who with knowledge acquired from other sources, could use these strings as reminders or suggestions by which events could be kept in memory. These interpreters bore the title of quipucamayus, or "keepers of the quipu," and it was their business to collect the records of the various departments of the government. One was at the head of what corresponds to a census bureau, keeping the details in reference to the population of the land and the list of those qualified to bear arms; another had charge of the revenues, and still another of the treasury. Thus the government kept stored away myriads of many-colored strings, which comprised what might be called the national archives.

S O S Alarm

The apparatus described in a recent issue of Radioelectricity consists of three main portions: An amplifier, a wireless receiving relay and the S O S selector. The amplifier takes the place of the crystal in the ship's ordinary wireless receiver and magnifies the received signals, rendering them suitable for operating the receiving relay. The S O S selector itself, which is controlled by the receiving relay, operates on the chain relay system. There are three relays arranged to discriminate between a dot and a dash, then a series of nine relays corresponding to the dots and dashes of the S O S signal. A canceling relay is incorporated, which restores the selector to its ready condition if the correct sequence of dots and dashes is not received, while the intervals between the dots and dashes are checked by a further delay action relay.—Scientific American.

Maddened at Sight of Bride

The mother of Franz Murn, a handsome Bavarian peasant of twenty-one, had long been trying to persuade him to marry Pauline Berndt, a rich widow with a large farm. His objection was that the widow was sixty-three and ugly. Finally the mother persuaded him to sacrifice himself for the good of the family and take the widow and her money.

When the bridegroom saw his bride totter up the aisle to join him at the altar his revulsion was so great that he went mad, drew the dagger which every peasant in Bavaria carries and cut off his mother's nose.

The bride fled.—Cincinnati Enquirer.

Alaskan Wonder

In Alaska, far removed from the usual haunts of men, is one of the most thrilling of natural wonders. It is the Valley of Ten Thousand Smokes, 50 square miles in extent, and broken by thousands of earth vents, through which pour incessantly hot gases from the volcanic area below. The valley was discovered as a result of the eruption in June, 1912, of Mount Katmai, which was then unknown as a volcanic mountain. The volcanic dust from Katmai's eruption traveled around the world, the scientists declared.

Serious Consequences

Florida—Don't you find the hot sun bad for the complexion?

Faunt—It's awful. It melts the rouge and leaves the face all streaky.—New York Sun and Globe.

Discovery of Dinosaurs.

Remains of dinosaurs have been found from time to time in North and South America, Europe, southern Asia, South Africa and northern Australia. The most noteworthy localities are Bernissart in Belgium and the Rocky mountains. The smallest of these prehistoric animals were about the size of a chicken; the largest attained lengths of from 60 to 70 feet; heights of from 10 to 20 feet and weights estimated at from 20 to 25 tons.

Calendar of Maya Indians.

Five hundred and eighty years B. C. marked the beginning of the calendar of the Maya Indians in Yucatan, according to investigators who have been digging into the astronomical records of this ancient people. The Mayas are supposed to have established a civilization more highly developed in many ways than that of the Aztecs or the Incas, whose great cities amazed the Spanish discoverers in the Sixteenth century.

Origin of Mule-Foot Hogs.

The mule-foot hog is a very ancient breed, probably natives of Africa. A little less than two centuries ago, Linnaeus, the famous Swedish naturalist, classified them as a distinct breed. Darwin, in 1859, described them, and mentioned that they were to be found in Scotland. This breed became established in America in 1908 by the formation of the National Mule-foot Hog association.

Softening Reproof

There is an oblique way of reproof which takes off from the sharpness of it.—Steele.

Four Elements

Ancient Greeks asserted that there were four elements: fire, air, earth and water.

A Real Crank

"Your friend Wheeler is a crank on punctuality, isn't he?" said Smith.

"I should say he is," replied Brown.

"Why, he even carries his watch in the hip pocket of his trousers to prevent his ever being behind time."

16 TO 20

We give \$16 in Aer-O-Plane Bonds for each \$1 paid on subscription to either Daily or Weekly Union-Herald.

It's Always Something

"How did you like my sermon Sunday?" asks the modern clergyman. "I couldn't get you," replies the radio churchgoer. "Too much theology?" asks the minister. "No," replies the radio lost sheep; "too much interference."—New York Sun and Globe.

HERRICK REFRIGERATORS

The Big Difference In Refrigerators

The main object of any refrigerator, of course, is the preservation of foods. The refrigerator that will keep foods in perfect condition longest is naturally the refrigerator you want—provided it doesn't increase your ice bills.

The Herrick answers those requirements with facts—not claims. And it does even more. It actually decreases your ice bills while giving you more effective food preservation.

And why? Simply because the Herrick is far more than an ice box—far more than a cold storage place. It is built on the scientifically demonstrated principle that more than merely cold air is necessary to keep foods in good condition for any great length of time.

Perhaps the biggest essentials to scientifically correct refrigeration are—

- No. 1. Circulation of cold dry air.
- No. 2. Effective Insulation.
- No. 3. Air-tight construction.

That the Herrick has these necessary essentials is a demonstrated fact.

Many proofs of the truth are visible even to the least informed purchaser. Others are hidden within the walls of the refrigerator, but nevertheless there, performing their functions so important to good health and economy.

FOR LORAIN SUFFERERS

Mayor Fitzpatrick Issues Appeal for Help for Stricken City.

Circleville Lodge of Elks Will Take the Initiative and Solicit Funds for This Worthy Cause Now is the Time to Apply the Golden Rule

In response to a telegram from the mayor of Lorain, Mayor Geo. M. Fitzpatrick, Sunday solicited aid of Circleville lodge, No. 77, Benevolent and Protective Order of Elks to take the initiative and solicit funds to be used for the relief of the citizens of our stricken sister city.

The telegram received by the mayor follows:

"Elyria, Ohio, July 5, 1924.
"Lorain, business district and part of residential section destroyed; thousands homeless and destitute; loss thirty millions. One-fourth this sum needed for emergency relief and immediate financial aid imperative. Please issue proclamation and establish agencies to collect all possible funds and forward same to John Gard treasurer, Lorain Chapter Red Cross.
"GEO. HOFFMAN,
"Mayor of Lorain."

The present conditions at Lorain necessitate the immediate assistance from our citizens by popular subscription and after giving the subject much thought, and realization the appeal for voluntary subscriptions made by Governor Donahey was not meeting with the desired result, in this city, I met with the local lodge on Sunday and with the assistance of Exalted Ruler Walker Baughman, had the following committee appointed, who will wait upon you on Tuesday beginning at 9 o'clock for your subscription to this worthy cause:

Committee.
Walker Baughman, Chairman
Senet Cryder Sr.
George Forest
George Brown
T. O. Gilliland
A. C. Cook
Charles Bell
A. T. Hammel
C. E. Roof
Henry Abernethy

Charles Mason
John Goeller Jr.
George Littleton
C. C. Chappellear
Max Friedman
Ed Prose.
D. S. Dunlap.

Circleville has never failed to do her share when confronted with an appeal of this kind and will, no doubt, respond liberally when the solicitors call.

The full significance of the disaster becomes more apparent as time goes by and Circleville will no doubt show her willingness to assist by a large subscription, to put Lorain and the entire stricken territory back on its feet. The honor of our community, with all its wealth, is at stake, and it is up to us to do as we would expect to be done by in similar circumstances. The city of Cleveland has contributed \$100,000. Thousands of dollars have been sent to the stricken area from Elyria and other nearby cities.

The amount required for this emergency at the lowest estimate is \$8,000,000, which no doubt will be raised if each does his part, but this should be done at once.

In conclusion, I ask that you respond as liberally as you can when the solicitor calls upon you. If you are missed and fail to see the solicitor when out on Tuesday your subscription will be sent along with the others if sent to me by Wednesday noon.

Respectfully,
GEO. M. FITZPATRICK
Mayor.

IT PAYS TO ADVERTISE

BEST OF HUMOR

Couldn't Be Sure
"Do you dance all the latest?"
"No, I was home all day yesterday."

Couldn't Shake Papa
"And did her father follow them when they eloped?"
"Sure; he's living with them yet."

Not Some, Anyway
Young Man—Don't you think that mind controls matter?
Critic—Not some reading matter.

Often the Case
"Is Algy really engaged to an actress?"
"The critics differ."

Star
"Ever see Sirius, the dog star?"
"What show is he with?"—Louisville Courier-Journal.

True Enough
"What's a fairy tale?"
"That depends on which way the ferry's going."

It Depends
Hewitt—I hit him on the impulse of the moment.
Jewett—Is that a vital spot?

Agreement
Judge (to witness)—One of you must be telling lies.
Woman—Of course he is, sir.

In These Days
"What do you think of a boy who can make a girl blush?"
"I think he's a wonder."—The Yellow Jacket.

Stoppage
Stranger—Don't the fast trains ever stop here?
Native—Yep. Had a wreck here once.—Life.

Told the Truth
Mrs. Willis—But this roof leaks.
Landlord—Well, didn't I say there was water on every floor?

Financial, Not Moral
Mrs. Benham—Do you object to my smoking?
Benham—Not if you buy your own cigars.

Siam's King a Poet
The king of Siam has had a villa built at his country place for the queen. It has been picturesquely named Suan Raj Radl, or the Royal Garden of Love.
While the king was attending scout maneuvers he wrote to the queen a daily letter which was in reality a love poem.
On the occasion of the house-warming for the queen's new villa one of these poems, consisting of some thirty verses, was distributed to the guests. It depicted the king as a happy husband and gave an intimate glimpse of his life of love with the queen—London Mail.

Big Sardinian Dam
The dam on the Tiro river in Sardinia, officially opened April 28, creates an artificial lake with a capacity of 450,000,000 cubic meters of water, which will give an estimated annual output of 50,000,000 kilowatt hours of electric power and irrigate 75,000 acres of land. The cheap power created by this dam will permit local electrolytic treatment of zinc ores, which have been exported hitherto, and will favor the development of other industries in the region. This is the first of several similar projects in Sardinia to increase the agricultural developments of the island.

Couldn't Find the Boxes
"Will you please tell me where the boxes are?" was the question propounded the pastor's secretary of the First Baptist church, Vermont and Meridian streets, as she stepped out of her office the other day.

It was a bewildered colored man who asked. Evidently he had been wandering about the church for some time.

On being asked what boxes he wanted the colored man said: "Why, lady, ain't dis yore de pos' office?"—Indianapolis News.

Want Weather Report
Prof. Harold W. Melvin, head of the English department of the engineering school of the Northwestern university in Chicago, has found out by taking a poll of his classes that the weather report is read by more students than any other type of news appearing in the daily newspaper. Sporting news attracted the first attention of about half of the students.

Animals Not Only Pets
In the rush of signing up for the pet parade, a youngster went into the Irvington branch library and asked whether she might enter the contest. When questioned as to what kind of a pet she was going to take, she replied:
"I haven't any pet, but another little girl wants to know if she can take her baby brother."—Indianapolis News

The Latest Creation
Cather—So the angels have brought you a new baby sister.
Jim (disgustedly)—To see the fuss she makes over her you'd think she came from Paris.

MRS. J. H. MAY

Died at Her Home on South Clinton Street Saturday.

Mrs. Maria May, wife of James H. May, died at her home on South Clinton street, Sunday evening at six o'clock. She had been ill of complications for the past six months.

The deceased was born in Chillicothe, Ross county, in September, 1863, and was the daughter of Silas and Eliza Morris Sheridan. She was twice married. Her first husband was Henry Bundy. She was married October 13, 1911, to James H. May, of this city, who survives.

Of her immediate family there are living two brothers and one sister; John and Wilson Sheridan, of Columbus and Lizzie Jones, of Westerville.

The funeral services will be held at her late home Wednesday afternoon at two o'clock. Rev. H. S. Grant will officiate. Interment will be in Greenlawn cemetery, Columbus.

Time's Rapid Sweep
Time steals on and escapes us, like the swift river that glides on with rapid stream.—Ovid.

Frank Sullivan on a drunk and disorderly charge, was given a fine of \$10 and costs.

In Memoriam.

Editor Union-Herald: — Martha Elizabeth Owens, daughter of John and Miranda Rector, was born in Deercreek township January 16, 1842 and died at her home in Wayne township, June 17, 1924, aged 82 years, five months and one day.

At an early day she united with the Methodist Episcopal church at Mt. Pleasant and later transferred her membership to Union Chapel, where it remained.)

In 1858 she was united in marriage to William Owens and to this union 12 children were born, eight of whom survive. They are George S., Harry M., Mrs. Minnie Cupp, Mrs. Susan Lape, William T. and Fred G., all of Wayne township; Mrs. Anna Petty, of Circleville and Mrs. Emma Decker, of Springfield.

Thirty-eight years ago her husband died and left her with a family of nine children and she taking the place of both father and mother, worked bravely for their interests. In her older days she sat in their midst like a queen for they have honored her as a good mother should be honored and have done what they could to make her comfortable. No one who has been privileged to see it can forget the glad light in her eyes when surrounded by her children and grandchildren, some of whom were with her on every Sunday and many other occasions.

Mrs. Owens was a splendid Christian woman and her greatest interest outside her own home, was centered in her church. How she loved that church and how she rejoiced when it prospered. She was respected and loved by her neighbors and the inactive for some time, her kindly face and sweet smile will be sadly missed.

Besides the immediate members of her own family, she leaves one sister Mrs. Louie McKennon, La Grand, Oregon; one half-sister, Mary, one half brother, Raymond, and an aged stepmother in Chicago, Illinois, also 17 grandchildren and eight great-grandchildren.

Card of Thanks.
We wish to thank all those who were so kind and helped during the sickness and after the death of our beloved mother. We wish to thank our friends and neighbors for the beautiful floral offerings. We also wish to thank Mr. C. E. Hill, Rev. R. L. Cross and the singers.

The Family.

Mr. and Mrs. W. W. White, of Columbus, who have been visiting her sister, Mrs. John Cherry of Williamsport, have returned home.

Miss Helen Hobart, of Medina, a student at the O. S. U., Columbus, who has been the weekend guest of Mrs. Brunelle Parrett Downing, has returned.

Miss Elizabeth Ritt, of the University of Vermont and Miss Isabel Ritt, a student at the College for Women at Oxford, have arrived home for the summer.

Mr. and Mrs. George R. Meyers and children of Columbus, who have been visiting his parents, Mr. and Mrs. C. E. Meyers in Stoutsville, have returned home.

Otto Slagle, of Columbus, who spent the weekend with his wife and family at the home of her parents, Mr. and Mrs. Chris Wolf, of South Pickaway street, has returned home.

Mrs. Paul Albert Huber, the authoress of Topeka, Kansas, who spent the weekend with Miss Laura Stout, went to Columbus today to visit friends before returning home.

George X. Cannon and son, John, of Freeport, Illinois, accompanied by his father, Michael Cannon and his grandchildren, Eleanor and Robert Cannon, of Columbus, called on relatives and friends in this city Saturday.

FOR LORAIN

SUFFERERS

Mayor Fitzpatrick Issues Appeal for Help for Stricken City.

Circleville Lodge of Elks Will Take the Initiative and Solicit Funds for This Worthy Cause Now is the Time to Apply the Golden Rule

In response to a telegram from the mayor of Lorain, Mayor Geo. M. Fitzpatrick, Sunday solicited aid of Circleville lodge, No. 77, Benevolent and Protective Order of Elks to take the initiative and solicit funds to be used for the relief of the citizens of our stricken sister city.

The telegram received by the mayor follows:

"Elyria, Ohio, July 5, 1924.

"Lorain, business district and part of residential section destroyed; thousands homeless and destitute; loss thirty millions. One-fourth this sum needed for emergency relief and immediate financial aid imperative. Please issue proclamation and establish agencies to collect all possible funds and forward same to John Gard treasurer, Lorain Chapter Red Cross.

"GEO. HOFFMAN,

"Mayor of Lorain."

The present conditions at Lorain necessitate the immediate assistance from our citizens by popular subscription and after giving the subject much thought, and realization the appeal for voluntary subscriptions made by Governor Donahey was not meeting with the desired result, in this city, I met with the local lodge on Sunday and with the assistance of Exalted Ruler Walker Baughman, had the following committee appointed, who will wait upon you on Tuesday beginning at 9 o'clock for your subscription to this worthy cause:

Committee.

Circleville has never failed to do her share when confronted with an appeal of this kind and will, no doubt, respond liberally when the solicitors call.

The full significance of the disaster becomes more apparent as time goes by and Circleville will no doubt show her willingness to assist by a large subscription, to put Lorain and the entire stricken territory back on its feet. The honor of our community, with all its wealth, is at stake, and it is up to us to do as we would expect to be done by in similar circumstances. The city of Cleveland has contributed \$100,000. Thousands of dollars have been sent to the stricken area from Elyria and other nearby cities.

The amount required for this emergency at the lowest estimate is \$8,000,000, which no doubt will be raised if each does his part, but this should be done at once.

In conclusion, I ask that you respond as liberally as you can when the solicitor calls upon you. If you are missed and fail to see the solicitor when out on Tuesday your subscription will be sent along with the others if sent to me by Wednesday noon.

Respectfully,

GEO. M. FITZPATRICK

Mayor.

IT PAYS TO ADVERTISE

BEST OF HUMOR

Couldn't Be Sure

"Do you dance all the latest?"

"No, I was home all day yesterday."

Couldn't Shake Papa

"And did her father follow them when they eloped?"

"Sure; he's living with them yet."

Not Some, Anyway

Young Man—Don't you think that mind controls matter?

Critic—Not some reading matter.

Often the Case

"Is Alky really engaged to an actress?"

"The critics differ."

Star

"Ever see Sirtus, the dog star?"

"What show is he with?"—Louisville Courier-Journal.

True Enough

"What's a fairy tale?"

"That depends on which way the ferry's going."

It Depends

Hewitt—I hit him on the impulse of the moment.

Jewett—Is that a vital spot?

Agreement

Judge (to witness)—One of you must be telling lies.

Woman—Of course he is, sir.

In These Days

"What do you think of a boy who can make a girl blush?"

"I think he's a wonder."—The Yellow Jacket.

Stoppage

Stranger—Don't the fast trains ever stop here?

Native—Yep. Had a wreck here once.—Life.

Told the Truth

Mrs. Willis—But this roof leaks.

Landlord—Well, didn't I say there was water on every floor?

Financial, Not Moral

Mrs. Benham—Do you object to my smoking?

Benham—Not if you buy your own cigars.

Siam's King a Poet

The king of Siam has had a villa built at his country place for the queen. It has been picturesquely named Suan Raj Radl, or the Royal Garden of Love.

While the king was attending scout maneuvers he wrote to the queen a daily letter which was in reality a love poem.

On the occasion of the house-warming for the queen's new villa one of these poems, consisting of some thirty verses, was distributed to the guests. It depicted the king as a happy husband and gave an intimate glimpse of his life of love with the queen—London Mail.

Big Sardinian Dam

The dam on the Tirso river in Sardinia, officially opened April 28, creates an artificial lake with a capacity of 450,000,000 cubic meters of water, which will give an estimated annual output of 50,000,000 kilowatt hours of electric power and irrigate 75,000 acres of land. The cheap power created by this dam will permit local electrolytic treatment of zinc ores, which have been exported hitherto, and will favor the development of other industries in the region. This is the first of several similar projects in Sardinia to increase the agricultural developments of the island.

Couldn't Find the Boxes

"Will you please tell me where the boxes are?" was the question propounded the pastor's secretary of the First Baptist church, Vermont and Meridian streets, as she stepped out of her office the other day.

It was a bewildered colored man who asked. Evidently he had been wandering about the church for some time.

On being asked what boxes he wanted, the colored man said: "Why, lady, ain't dis yere de pos' office?"—Indianapolis News.

Want Weather Report

Prof. Harold W. Melvin, head of the English department of the engineering school of the Northwestern university in Chicago, has found out by taking a poll of his classes that the weather report is read by more students than any other type of news appearing in the daily newspaper. Sporting news attracted the first attention of about half of the students.

Animals Not Only Pets

In the rush of signing up for the pet parade, a youngster went into the Irvington branch library and asked whether she might enter the contest. When questioned as to what kind of a pet she was going to take, she replied:

"I haven't any pet, but another little girl wants to know if she can take her baby brother."—Indianapolis News.

The Latest Creation

Cather—So the angels have brought you a new baby sister.

Jim (disgustedly)—To see the fuss she makes over her you'd think she came from Paris.

MRS. J. H. MAY

Died at Her Home on South Clinton Street Saturday.

Mrs. Maria May, wife of James H. May, died at her home on South Clinton street, Sunday evening at six o'clock. She had been ill of complications for the past six months.

The deceased was born in Chillicothe, Ross county, in September, 1863, and was the daughter of Silas and Eliza Morris Sheridan. She was twice married. Her first husband was Henry Bundy. She was married October 13, 1911, to James H. May, of this city, who survives.

Of her immediate family there are living two brothers and one sister; John and Wilson Sheridan, of Columbus and Lizzie Jones, of Westerville.

The funeral services will be held at her late home Wednesday afternoon at two o'clock. Rev. H. S. Grant will officiate. Interment will be in Greenlawn cemetery, Columbus.

Time's Rapid Sweep

Time steals on and escapes us, like the swift river that glides on with rapid stream.—Ovid.

In Memoriam.

Editor Union-Herald: — Martha Elizabeth Owens, daughter of John and Miranda Rector, was born in Deercreek township January 16, 1842 and died at her home in Wayne township, June 17, 1924, aged 82 years, five months and one day.

At an early day she united with the Methodist Episcopal church at Mt. Pleasant and later transferred her membership to Union Chapel, where it remained.

In 1858 she was united in marriage to William Owens and to this union 12 children were born, eight of whom survive. They are George S., Harry M., Mrs. Minnie Cupp, Mrs. Susan Lape, William T. and Fred G., all of Wayne township; Mrs. Anna Petty, of Circleville and Mrs. Emma Decker, of Springfield.

Thirty-eight years ago her husband died and left her with a family of nine children and she taking the place of both father and mother, worked bravely for their interests. In her older days she sat in their midst like a queen for they have honored her as a good mother should be honored and have done what they could to make her comfortable. No one who has been privileged to see it can forget the glad light in her eyes when surrounded by her children and grandchildren, some of whom were with her on every Sunday and many other occasions.

Mrs. Owens was a splendid Christian woman and her greatest interest outside her own home, was centered in her church. How she loved that church and how she rejoiced when it prospered. She was respected and loved by her neighbors and tho inactive for some time, her kindly face and sweet smile will be sadly missed.

Besides the immediate members of her own family, she leaves one sister Mrs. Louie McKennon, La Grand, Oregon; one half-sister, Mary, one half brother, Raymond, and an aged stepmother in Chicago, Illinois, also 17 grandchildren and eight great-grandchildren.

Card of Thanks.

We wish to thank all those who were so kind and helped during the sickness and after the death of our beloved mother. We wish to thank our friends and neighbors for the beautiful floral offerings. We also wish to thank Mr. C. E. Hill, Rev. R. L. Cross and the singers.

The Family.

AMUSEMENTS

Filmed in Sonora, California, one of the oldest and most historic of the California gold towns. George Melrod's Paramount production "Flaming Barriers," which comes to the Met theater Monday has for its background a country in which much of the western state's romantic story was developed.

When the Foreign Miners Tax law of 1850, which forced foreigners to pay thirty dollars a month for the right of mining in California, was passed, the principal opposition to it was manifested by Mexicans located in and around Sonora.

Several of the scenes for "Flaming Barriers" were filmed on the banks of the Stanislaus river where, some seventy years ago, one hundred miners banded together to protect the rights of several Chinamen who had been driven off their claim by three gaunt long-haired men from Arkansas.

"Flaming Barriers" retains strong flavor of the old days of the west, altho it is a modern story with a gripping, fast moving plot. The little town of Burbridge, where most of the action takes place, is a battle ground on which the things of yesterday and the things of today struggle for the mastery. The featured players who appear in this picture are Jacqueline Logan, Aotnio Moreno and Walter Heirs.

16 TO 7.

AN ORDINANCE

No. 499 determining to proceed with the improvement of Franklin Street, in the City of Circleville, Ohio, from the east line of Scioto street to the east line of Mingo street by grading, paving, curbing, draining and sewer-ing same.

It is ordained by the Council of the City of Circleville, State of Ohio, Three Members present, the Members Elected to the Council, Concurring:

Section 1. That it is hereby determined to proceed with the improvement of Franklin Street in the City of Circleville, Ohio, from the east line of Scioto street to the east line of Mingo street, by grading and paving the same to the width of thirty-six feet (36) (excepting that between the east line of East Area Alley and the west line of Pickaway street, said brick pavement shall be constructed to the width of eighteen (18) feet to the south of the center of Franklin street at said point, and to the width of seventeen (17) feet to the north of the center of said street at said point, making said brick pavement of thirty-five (35) feet in width between said East Area Alley and said Pickaway street), by using six (6) inches of concrete base, and one (1) inch of sand cushion and by using hard burned vitrified paving brick; the curbs to be six (6) inches in width and eighteen (18) inches deep and to be of concrete and by con-structing the necessary sewers, drains, sub-drains and catch basins, in ac-cordance with Resolution No. 481 passed on the 5th day of March, A. D. 1924, and in accordance with the plans, specifications, estimates and proposals of said proposed improvement heretofore approved by this Council and now on file in the office of the Director of Pub-lic Service of the City of Circleville, Ohio.

Section 2. That all claims for dam-ages resulting from said improvement shall be judicially inquired into after the completion of said proposed im-provement, and the Solicitor of said City be and he is hereby authorized and directed to institute proceedings in a Court of competent jurisdiction to inquire into such claims.

Section 3. That the whole cost of said proposed improvement, less one-fiftieth (1-50) thereof and the cost of intersections, also less the cost of con-structing the storm water sewers pro-vided for on the plans of said proposed improvement, shall be issued in pro-portion to the benefits which may result from said upon the following de-terminations: That all lots and lands bounded and abutting upon the said proposed improvement, which said lots and lands are hereby deter-mined to be specially benefited by said improvement and the cost of said im-provement shall include the expenses of the preliminary and other surveys and of printing and publishing the notices, resolutions and ordinances re-quired and the serving of said notices, the cost of construction, together with interest on bonds issued in anticipation of the collection of deferred assess-ments and all other necessary ex-penditures.

Section 4. That the assessments so to be levied shall be paid in not more than ten annual installments, with in-terest, on deferred payments at the same rate of interest as shall be borne by the bonds to be issued in anti-cipation of the levy and collection there-of; provided that the owner of any property assessed may, at his option pay such assessment in cash within thirty days after the passage of the assessing ordinance in which case said cash assessment shall not include any item of interest upon bonds to be is-sued in anticipation of the collection of deferred installments of assess-ments.

Section 5. That bonds of the City of Circleville, Ohio, shall be issued in an-ticipation of the levy and collection of assessments by installments and in an amount equal thereto.

Section 6. That the remainder of the entire cost of said improvement not specially assessed, including the cost of intersections, and the cost of storm water sewers, together with the cost of any real estate or interest therein purchased or appropriated, and the costs and expenses of any appropria-tion proceedings thereof, and the dam-ages awarded any owner of adjoining land, and interest thereon, and the costs of any such award, shall be paid out of a fund raised by the issue and sale of bonds of said City of Circleville in the manner provided by law, and there be and hereby is appropriated from said fund (fund created from the issue and sale of said bonds) the sum of money sufficient to meet the re-quirements of the said remainder of said costs.

Section 7. That the Director of Pub-lic Service of said City of Circleville be and he hereby is authorized and di-rected to make and execute a contract for said improvement with the lowest and best bidder after advertisement ac-cording to law.

Section 8. This ordinance shall take effect and be in force from and after the earliest period allowed by law. Passed by Council this 2d day of July, A. D. 1924.

JOHN C. GOELLER

President of Council.

Attest:—Fred R. Nicholas,

Clerk of Council.

The foregoing ordinance was filed

with me on July 2, 1924, and was ap-proved by me July 2, 1924.

W. M. FITZPATRICK,

Mayor of the City of Circleville, Ohio.

July 2, 1924.

BLACKBERRIES

Big Crop is Promised in Hill Counties—Late Harvest.

The blackberry crop in the hill counties, while a little later than usual, promises to be heavy again this year, or at least reports brought back by persons who have been thru sections of the hill counties to the south, indicate that the yield will be large if nothing interferes between the present time and the time for ripening of the berries.

The old belief that rain on the second of June would ruin the berry crop seems to have been a little off this year, as rain fell on that day, at least in some parts of the blackberry belt, and apparently it did not affect the berries.—Washington C. H. Herald.

SUDDEN DEATH

Body of Arch McMillan Found in Gravel Pit Near Orient.

Arch McMillan, a well known resident of Scotto township, on Friday evening was found dead in a gravel pit near Orient where he had been working.

He is survived by his widow and two sons, Frank and Charles, all of Orient.

The funeral services were held Sunday afternoon from King church and burial was in the Muhlenberg town-ship cemetery at Darbyville.

Mr. and Mrs. W. M. Beavers and daughter, Miss Leathe Belle, of this city, attended the funeral.

Not Precarious

"Your life hangs by a thread," said the doctor. The patient breathed a sigh of relief; he was married, and often had buttons remain that way for a long, long time.—Boston Transcript.

FINE COUNTRY HOME FOR SALE.

335 acre tract with a nice cozy, modern brick dwelling; two good barns and other buildings, including scales and scale house. It has a very fine orchard. All land can be culti-vated with a natural drainage; located along Scioto creek and the state high-way, in the heart of our famous Pick-away Plains, known as the Daniel Hit-ler homestead, and is counted the finest farm in Pickaway county. It is located not far from school and mar-ket. Owner wishes to retire from the farm as he has other business inter-ests requiring his attention, therefore we are offering this beautiful place at a sacrifice price for a short time.

For price and terms, call or write, A. W. Phillips, or, Circle Realty Co., Circleville, O.

BUNDLE DAY

Cast-off Clothing Solicited for Needy in the Far East.

Wednesday, July 9, is Near East Re-lief bundle day. The people of Cir-cleville are asked to give their cast-off, wornout clothing to the needy refugees of Asia Minor and it is pointed out that these old garments for which we have no further use, may be the means of saving lives in the Near East during next winter's bitter weather.

Everybody has old clothes. Most people are quite willing to give them away to a worthy charity "only" they say, "it is a lot of trouble to make up a bundle and I am very busy."

True, it is something of a task to tie up a bundle and no doubt most of us are very busy but also it is wise, in the rush of this busy life, to take an occasional step toward the kingdom of heaven. So let us take the trouble and answer the appeal with a deluge of old clothing. We shall feel better for hav-ing done it and some miserable refugee in the Near East whom we shall never know, will thank us with the breath we kept in his body.

Bring your bundles to the mayor's office where they will be tagged and you will receive proper credit.

SAWDUST RING.

Ringling Brothers could not show in Columbus today unless the former treasurer of Sells Brothers show, Rudolph Gessley, was in attendance. Mr. Gessley went to Columbus after dinner today and reported.

AT THE COURT HOUSE

Marriage License

Avery Heeter, 18, laborer, and Mary Griffey, 17, both of this city. Consent of parents.

Weight of Coo Output

Corncobs produced in the United States each year weigh more than 20,000,000 tons.

FOR SALE.

Ambon brick block, consisting of two good store rooms with flat over both rooms with a frontage of 60 feet and a depth of 130 feet with an in-come 10% net; located, corner Main and Western avenue; this is ideal lo-cation for an oil station or a small factory. Besides the above building I have a small stove, safe, desk and wood partitions suitable for an office or store. For further information call CIRCLE REALTY CO. W. C. Morris, Secretary. Phone 234.

SOCIAL CALENDAR

The marriage is announced of Miss Mary Erskine, daughter of Mrs. John F. Erskine, of Zanesville, Ohio, and Mr. James Harold Leist, son of Dr. and Mrs. G. G. Leist, on Saturday, June 28, 1924. The ceremony was performed in the Presbyterian manse by Rev. Mr. Johnson, pastor of the Presbyterian church of Zanesville.

Miss Hester Bentley entertained to a luncheon on the Fourth in honor of Miss Isabel Hayes, of Springfield, who is the house guest of Mrs. Harp Van Riper. Those who enjoyed the noon hour as guests were Misses Helen Schiear, Helen Snyder, Alice Adah May, Lucile Rooney, Marian Hitler and the guest of honor. The home was artistically decorated in the national colors and baskets of crim-son ramblers.

Miss Genevieve L. English and Mrs. Margaret E. Stocklen have issued in-vitations to bridge Saturday, July 12, honoring their sister, Helen Rose, a bride-elect.

REAL ESTATE DEALS.

John W. and Mary E. Smith sold their property consisting of 6 rooms located on Town street to John R. and Edith Hoffman and C. F. Reichelderfer and wife sold their property con-sisting of 6 rooms located on South Scioto street to Gerge and Katie An-drews. Both sales were made thru the Circle Realty Co.

EASTERN STAR.

The regular meeting of Circleville chapter, Order of the Eastern Star, will be held Tuesday evening at 7:30 o'clock. A class of candidates will be initiated and all members are urged to attend. 7julyd2.

CIRCLEVILLE, OHIO.

**JEAN'S VISION
TOOK HER HOME**

By MYRA A. WINGATE

(©, 1924, by McClure Newspaper Syndicate.)

LUKE BRADSTREET paused to look back at the house standing in a corner formed by two of the village streets.

A neighbor passed to say: "Ah, Luke, how is Mrs. Bradstreet this morning?"

"Thanks, John, there is no great change yet, but we are hoping much from the new treatment."

"Glad to hear that," said his friend. "Jean will be here soon, I suppose?"

"I'm really expecting her this morning, though I've had no word," returned Bradstreet, glancing at his watch. His face had lighted as if he sensed a slight lifting of his heart burden. "I must be on my way."

On top of the pile of mail passed out to Luke was a thick letter addressed in Jean's clear hand. He was disappointed, but reflected that he had written her there was no immediate danger.

As he walked to the store his tired brain performed odd jumps from business considerations to plans for his sick wife, and back again to Jean. She was their only child—pretty, gifted, ambitious. Her pet subject in college had been journalism. Already, at twenty-five, she was "the makings" of a writer. Luke remembered, with fatherly pride, her pleasure in being able to provide for herself. His own shrewdness and business judgment showed there. Not that Luke put it to himself in those terms. What he thought was:

"There's a little of the old man there, for all she's just like her mother."

Reaching his office, he slit the envelope eagerly. He read the letter, first hastily, and again slowly. Affection, sympathy and deep concern, beautifully expressed, were there, but—

"You say that I can have all the necessary help, and all my time for my own work, but that both you and mother need me for sympathy, advice and companionship. Do you think it would work out that way, daddy, dear? Here's my view of it: You say the disease progresses slowly, is often arrested and sometimes cured. Mother is able to sit up and read. You have a good housekeeper and a competent nurse. My time would surely be broken by various demands. Under such conditions I could not maintain the cheerful note that I wish to sound. You would not ask a son working at a distance to give up and come home for those reasons. Is my work less important?"

"Write me every little thing about mother. You know you're my best beloved. I shall be at home, as usual, in June, and we'll talk it over then."

"Another girl and I have a wonderful plan for the summer. We're going to do Maine in a car, stopping wherever we like, to absorb local color—"

Luke methodically folded the pages small and cut them into tiny squares with his paper knife. He heaped them on an ash tray and touched a match to them.

Jean Bradstreet awakened to a curious experience that morning—awakened in her own room, the ivory clock ticking on the dresser, the surroundings apparently veiled in early morning dimness. Powerless to move or utter sound, she lay looking down a broad beam of light. She saw her father cross the main street of the village. He nodded in passing to two men talking at the foot of the stone steps leading to the bank. Jean knew them. The clearness of her vision was startling. After Luke had passed, Leonard Willis said to Jasper Gale:

"Luke Bradstreet has aged ten years since his wife was stricken. I'm told there's only a chance of recovery."

The words were as distinct as if spoken in the room. Jean cried out mightily and found herself standing upon her own bedside rug, the tears upon her cheeks. The hands of the ivory clock pointed to nine.

At four that afternoon, Leonard Willis, directing a gang of laborers laying water pipes, saw a car rocketing down the road toward the village. There was a squeal of brakes as it passed, and presently a voice called:

"Oh, Leonard."

He ran to the car, hand extended. "Jean Bradstreet!"

Jean clasped and held the hand in her intensity.

"Leonard, were you standing at the foot of the bank steps at nine o'clock and did you say, 'Luke Bradstreet has aged ten years since his wife was stricken. I'm told there's only a chance of recovery?'"

Leonard hesitated, reluctant, and then blurted honestly, "Yes, Jean."

The car leaped forward, leaving Leonard dazed and wondering.

Luke Bradstreet swung around in his desk chair as quick steps sounded in the hall.

"Jean!" he said, rising unsteadily.

"Sit down, you blessed old goose," said Jean, pushing him back. "You're so white I know you've had no dinner."

"You're white, too," countered Luke, feebly.

"Small wonder," commented Jean. "I have had no dinner myself. Oh, Dad, that awful letter!"

"What happened, Jean?" questioned Luke quietly.

"It was a vision," stated Jean, solemnly. "And it brought me. I'm here to stay."

And then, being a very modern girl, she added:

"Have a heart, Dad, and give me three grains of corn, or something to keep me alive until dinner time."

PURE BRED LIVE STOCK FIGURES
SHOW CONSIDERABLE VARIATION

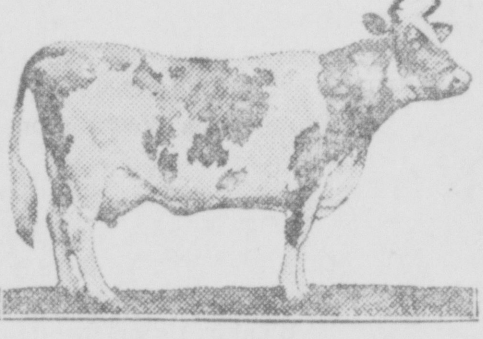

Pure Bred Herefords Are Gaining in Popularity.

(Prepared by the United States Department of Agriculture.)

Average prices of pure bred Short-horn and Hereford cattle for the first six months of 1923 were somewhat lower than in 1922, whereas the Red Polled and Aberdeen Angus were slightly higher, according to a survey recently completed by the United States Department of Agriculture.

Prices of pure bred dairy cattle show considerable variation, being practically steady for Holstein and Brown Swiss, higher for Jerseys, and lower for Ayrshire and Guernseys. The pure bred draft horse market showed little activity. Average sale price of pure bred sheep also showed variations, the Dorset, Hampshire, and Shropshire breeds being about steady, with Lincoln, Oxford and Rambouillet showing declines, and Southdown, Romney, Cheviot and Cotswold showing advances.

Pure Bred Beef Cattle.
Reports were made on 9,534 pure bred beef cattle. In most instances the animals sold at auction brought more than those sold privately, but the bulk of each breed was sold at private sale. The survey shows that a number of pure bred bulls were sold at a lower price than they might have brought had they been marketed as steers at the same weight. A number of breeders reported that they were not offering anything for sale but were

More Guernseys Are Being Imported Than Any Other Breed.

buying all the outstanding individuals in their vicinity.

Average prices of all ages and both sexes for both 1922 and the first half of 1923 are shown in the following table:

	No. Sold	1922	1923	1922	1923
Aberdeen Angus	1,443	1,226	1,104	\$110	\$110
Hereford (Horned)	923	4,750	123	114	114
Hereford (Polled)	411	350	129	118	118
Red Polled	434	289	83	88	88
Shorthorn	4,621	2,919	129	111	111

The highest prices reported were: Aberdeen Angus bull \$1,070, female \$1,550; Hereford bull \$2,500, female \$1,050; Polled Hereford bull \$900, female \$255; Red Polled bull \$305, female \$1,050; Shorthorn bull \$2,000, female \$1,500. A small number of each breed brought \$250 or more. The

Pure Bred Rambouillet Ram

number selling for less than \$50 were Aberdeen Angus 220, Hereford 587, Polled Hereford 38, Red Polled 52 and Shorthorn 380.

Pure Bred Dairy Cattle.
Of 6,612 dairy cattle sold, 1,650 brought over \$250 each, and 698 sold for less than \$50. Nearly two-thirds of the animals reported sold ranged from \$50 to \$250 each.

Average prices of all ages and both sexes were as follows:

	No. Sold	1922	1923	1922	1923
Ayrshire	509	271	182	\$130	\$130
Guernsey	2,160	1,753	273	234	234
Holstein	2,797	3,406	187	188	188
Jersey	1,975	972	187	228	228
Brown Swiss	157	210	124	121	121

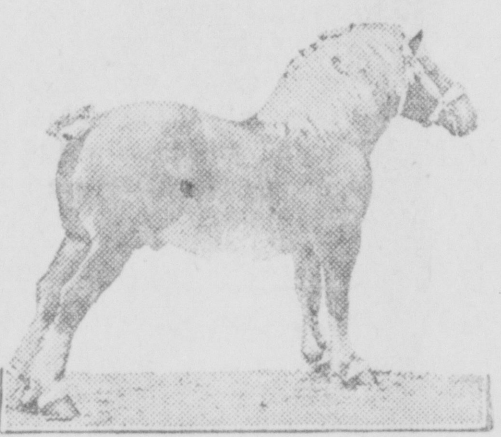

The highest prices received by breeds were: Ayrshire bull \$300, female \$1,700; Brown Swiss bull \$300, female \$350; Guernsey bull \$7,500, female \$7,500; Holstein bull \$2,000, female \$2,550; Jersey bull \$2,500, female \$6,000. For all breeds animals sold at auction averaged higher in prices than those sold privately, the difference ranging from \$32 to \$265 per animal. More than twice as many animals were sold at private sale as at auction.

Pure Bred Draft Horses.
Of 233 pure bred draft horses sold, 168 brought above \$150 each. More

than half the breeders reporting stated they had not sold an animal during the period of January 1 to July 1, 1923.

	Av. Price	1922	1923
Belgian	\$259	\$229	
Clydesdale	131	221	
Percheron	235	394	
Shire	124	229	

Top prices received were: Belgian stallion \$2,400, mare \$800; Clydesdale stallion \$700, mare \$550; Percheron stallion \$2,100, mare \$1,000; Shire stallion \$500, mare \$225. The demand was largely for mares and stallions over two years old. The survey as a

Champion Belgian Stallion.

whole indicates that the horse-breeding business has been greatly curtailed due to lack of demand, the department says.

Pure Bred Sheep.
Of 8,498 pure bred sheep reported sold only 31 brought \$150 or more, whereas 6,192 sold for \$25 or less.

The number and average prices of pure bred sheep by breeds for the first half of 1923 compared with the entire year 1922, were as follows:

	No. Sold	1922	1923	1922	1923
Cheviot	231	102	329	\$34	\$34
Cotswold	270	197	19	28	28
Dorset	230	39	19	19	19
Hampshire	6,370	1,423	29	29	29
Lincoln	153	97	20	17	17
Oxford	578	380	23	17	17
Rambouillet	3,362	5,181	34	37	37
Romney	486	38	24	27	27
Shropshire	861	787	25	25	25
Southdown	280	274	27	31	31

Highest prices by breeds were: Cheviot male \$100, female \$100; Cotswold male \$200, female \$100; Dorset male \$35, female \$25; Oxford male \$100, female \$80; Rambouillet male \$800, female \$65; Romney male \$75, female \$40; Shropshire male \$125, female \$75; Southdown male \$100, female \$50; Hampshire male \$250, female \$90; Lincoln male \$40, female \$25.

Most Economical Ration
Supplies Needed Protein

Farmers who are feeding calves and expect to market them in late spring or early summer should not overlook the fact that the most economical ration that can be fed is the one that supplies a liberal portion of protein. Corn, other grains, and most roughages are deficient in protein. The cheapest source of protein for cattle is cottonseed cake or meal. If no alfalfa or clover is fed, two pounds per head per day should be fed. If limited amounts of alfalfa or clover hay are available, one pound per head per day will be sufficient; if alfalfa is the only roughage fed, no cottonseed cake or meal will be necessary.

Bacteria Required for
Inoculating Bean Soil

Soil from an alfalfa field cannot be used to inoculate ground for beans. The bacteria which work on the beans are quite different from those which work on the roots of alfalfa. There is perhaps as much difference between the two as there would be between sheep and cows, to make a simple illustration. There are several classes of these bacteria which work on the roots of the legumes. All the different kinds of clover have much the same bacteria. The alfalfa bacteria are somewhat different, and also those of the bean or the cow pea. All these different bacteria have been separated and can be bought, safely packed in bottles, so that they can be used without great trouble.

Rotation Is Big Help

A definite rotation of crops is a farmer's most helpful friend. Such a system lowers cost per bushel or ton, distributes labor economically, incorporates humus in the soil, controls weed growth and eliminates risk from growing one crop.

Wonder Plant of Madagascar.
Refreshing liquid for the thirsty traveler in Madagascar, even in the driest seasons, is provided by the water from the surface of the banana-like leaves of a tree growing on the island, known as the traveler's plant. This same plant is otherwise useful in that the leaves are serviceable in house building as thatch, partition, and even in making walls. The hard, external cortex is stripped off, beaten flat, and used for flooring. The green leaves do duty also as wrapping paper, rain sheds, table cloths and dishes, and when folded properly as spoons or drinking vessels. The flowers of the plant inclose seeds that are edible, and yield an essential oil.

Voltaire's Scheme.
In France it is said that when Voltaire, who was of a frail appearance, reached the age of forty he had accumulated a fortune of \$400,000, but that this money was not earned from the sale of his books. The story is that he made most of it by lending money to needy noblemen. It would appear that the astute philosopher would lend an heir to an estate a large sum on condition that the heir should pay him 10 per cent interest on the amount as long as both of them lived. The heir would be neither required nor allowed to pay off the principal; and the agreement ended only when Voltaire died.

MACK PARRETT

JEAN'S VISION
TOOK HER HOME

By MYRA A. WINGATE

LUKE BRADSTREET paused to look back at the house standing in a corner formed by two of the village streets.

A neighbor passed to say: "Ah, Luke, how is Mrs. Bradstreet this morning?"

"Thanks, John, there is no great change yet, but we are hoping much from the new treatment."

"Glad to hear that," said his friend. "Jean will be here soon, I suppose?"

"I'm really expecting her this morning, though I've had no word," returned Bradstreet, glancing at his watch. His face had lighted as if he sensed a slight lifting of his heart burden. "I must be on my way."

On top of the pile of mail passed out to Luke was a thick letter addressed in Jean's clear hand. He was disappointed, but reflected that he had written her there was no immediate danger.

As he walked to the store his tired brain performed odd jumps from business considerations to plans for his sick wife, and back again to Jean. She was their only child—pretty, gifted, ambitious. Her pet subject in college had been Journalism. Already, at twenty-five, she was "the makings" of a writer. Luke remembered, with fatherly pride, her pleasure in being able to provide for herself. His own shrewdness and business judgment showed there. Not that Luke put it to himself in those terms. What he thought was:

"There's a little of the old man there, for all she's just like her mother."

Reaching his office, he slit the envelope eagerly. He read the letter, first hastily, and again slowly. Affection, sympathy and deep concern, beautifully expressed, were there, but—

"You say that I can have all the necessary help, and all my time for my own work, but that both you and mother need me for sympathy, advice and companionship. Do you think it would work out that way, daddy, dear? Here's my view of it: You say the disease progresses slowly, is often arrested and sometimes cured. Mother is able to sit up and read. You have a good housekeeper and a competent nurse. My time would surely be broken by various demands. Under such conditions I could not maintain the cheerful note that I wish to sound. You would not ask a son working at a distance to give up and come home for those reasons. Is my work less important?"

"Write me every little thing about mother. You know you're my best beloved. I shall be at home, as usual, in June, and we'll talk it over then."

"Another girl and I have a wonderful plan for the summer. We're going to do Maine in a car, stopping wherever we like, to absorb local color."

Luke methodically folded the pages small and cut them into tiny squares with his paper knife. He heaped them on an ash tray and touched a match to them.

Jean Bradstreet awakened to a curious experience that morning—awakened in her own room, the ivory clock ticking on the dresser, the surroundings apparently veiled in early morning dimness. Powerless to move or utter sound, she lay looking down a broad beam of light. She saw her father cross the main street of the village. He nodded in passing to two men talking at the foot of the stone steps leading to the bank. Jean knew them. The clearness of her vision was startling. After Luke had passed, Leonard Willis said to Jasper Gale:

"Luke Bradstreet has aged ten years since his wife was stricken. I'm told there's only a chance of recovery."

The words were as distinct as if spoken in the room. Jean cried out mightily and found herself standing upon her own bedside rug, the tears upon her cheeks. The hands of the ivory clock pointed to nine.

At four that afternoon, Leonard Willis, directing a gang of laborers laying water pipes, saw a car rocketing down the road toward the village. There was a squeal of brakes as it passed, and presently a voice called:

"Oh, Leonard."

He ran to the car, hand extended. "Jean Bradstreet!"

Jean clasped and held the hand in her intensity.

"Leonard, were you standing at the foot of the bank steps at nine o'clock and did you say, 'Luke Bradstreet has aged ten years since his wife was stricken. I'm told there's only a chance of recovery'?"

Leonard hesitated, reluctant, and then blurted honestly, "Yes, Jean."

The car leaped forward, leaving Leonard dazed and wondering.

Luke Bradstreet swung around in his desk chair as quick steps sounded in the hall.

"Jean!" he said, rising unsteadily.

"Sit down, you blessed old goose," said Jean, pushing him back. "You're so white I know you've had no dinner."

"You're white, too," countered Luke, feebly.

"Small wonder," commented Jean. "I have had no dinner myself. Oh, Dad, that awful letter!"

"What happened, Jean?" questioned Luke quietly.

"It was a vision," stated Jean, solemnly. "And it brought me. I'm here to stay."

And then, being a very modern girl, she added:

"Have a heart, Dad, and give me three grains of corn, or something to keep me alive until dinner time."

PURE BRED LIVE STOCK FIGURES
SHOW CONSIDERABLE VARIATION

Pure Bred Herefords Are Gaining in Popularity.

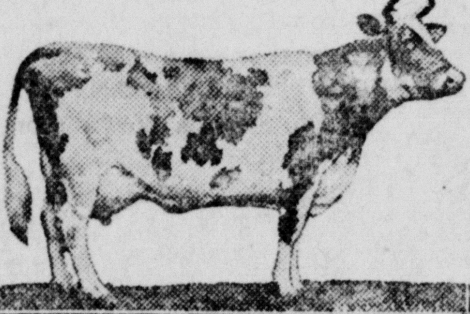

(Prepared by the United States Department of Agriculture.)

Average prices of pure bred Short-horn and Hereford cattle for the first six months of 1923 were somewhat lower than in 1922, whereas the Red Polled and Aberdeen Angus were slightly higher, according to a survey recently completed by the United States Department of Agriculture.

Prices of pure bred dairy cattle show considerable variation, being practically steady for Holstein and Brown Swiss, higher for Jerseys, and lower for Ayrshire and Guernseys. The pure bred draft horse market showed little activity. Average sale price of pure bred sheep also showed variations, the Dorset, Hampshire, and Shropshire breeds being about equal, with Lincoln, Oxford and Rambouillet showing declines, and Southdown, Romney, Cheviot and Cotswold showing advances.

Pure Bred Beef Cattle.

Reports were made on 9,534 pure bred beef cattle. In most instances the animals sold at auction brought more than those sold privately, but the bulk of each breed was sold at private sale. The survey shows that a number of pure bred bulls were sold at a lower price than they might have brought had they been marketed as steers at the same weight. A number of breeders reported that they were not offering anything for sale but were

More Guernseys Are Being Imported Than Any Other Breed.

buying all the outstanding individuals in their vicinity.

Average prices of all ages and both sexes for both 1922 and the first half of 1923 are shown in the following table:

	No. Sold	1922	1923	1922	1923
Aberdeen Angus	1,443	1,226	1,104	\$110	
Hereford (Horned)	923	4,750	123	114	
Hereford (Polled)	411	350	129	118	
Red Polled	434	289	83	88	
Shorthorn	4,621	2,919	129	111	

The highest prices reported were: Aberdeen Angus bull \$1,070, female \$1,550; Hereford bull \$2,500, female \$1,050; Polled Hereford bull \$900, female \$255; Red Polled bull \$305, female \$1,050; Shorthorn bull \$2,000, female \$1,500. A small number of each breed brought \$250 or more. The

Pure Bred Rambouillet Ram

number selling for less than \$50 were Aberdeen Angus 220, Hereford 387, Polled Hereford 38, Red Polled 52 and Shorthorn 380.

Pure Bred Dairy Cattle.

Of 6,612 dairy cattle sold, 1,680 brought over \$250 each, and 698 sold for less than \$50. Nearly two-thirds of the animals reported sold ranged from \$50 to \$250 each.

Average prices of all ages and both sexes were as follows:

	No. Sold	1922	1923	1922	1923
Ayrshire	609	271	182	\$130	
Guernsey	2,160	1,753	273	234	
Holstein	2,797	3,406	187	188	
Jersey	1,975	972	187	228	
Brown Swiss	157	210	124	121	

The highest prices received by breeds were: Ayrshire bull \$300, female \$1,700; Brown Swiss bull \$300, female \$350; Guernsey bull \$7,500, female \$7,500; Holstein bull \$2,000, female \$2,850; Jersey bull \$2,500, female \$6,000. For all breeds animals sold at auction averaged higher in prices than those sold privately, the difference ranging from \$32 to \$205 per animal. More than twice as many animals were sold at private sale as at auction.

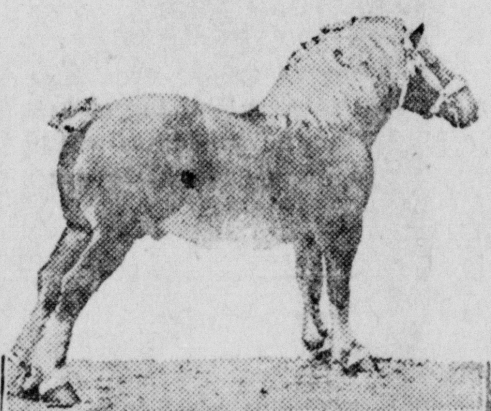

Pure Bred Draft Horses.

Of 233 pure bred draft horses sold, 188 brought above \$150 each. More

than half the breeders reporting stated they had not sold an animal during the period of January 1 to July 1, 1923.

	Av. Prices	1922	1923
Belgian		\$259	\$229
Clydesdale		131	221
Percheron		235	394
Shire		124	229

Top prices received were: Belgian stallion \$2,400, mare \$800; Clydesdale stallion \$700, mare \$550; Percheron stallion \$2,100, mare \$1,000; Shire stallion \$500, mare \$225. The demand was largely for mares and stallions over two years old. The survey as a

Champion Belgian Stallion.

whole indicates that the horse-breeding business has been greatly curtailed due to lack of demand, the department says.

Pure Bred Sheep.

Of 8,498 pure bred sheep reported sold only 31 brought \$150 or more, whereas 6,192 sold for \$25 or less.

The number and average prices of pure bred sheep by breeds for the first half of 1923 compared with the entire year 1922, were as follows:

	No. Sold	1922	1923	1922	1923
Cheviot	231	102	229	\$34	
Cotswold	270	167	19	28	
Dorset	260	39	19	19	
Hampshire	6,870	1,433	29	29	
Lincoln	153	97	20	17

Rambouillet	3,362	5,181	34	17	
Romney	486	38	24	27	
Shropshire	861	787	25	25	
Southdown	289	274	27	31	

Highest prices by breeds were: Cheviot male \$100, female \$100; Cotswold male \$35, female \$25; Oxford male \$100, female \$80; Rambouillet male \$800, female \$65; Romney male \$75, female \$40; Shropshire male \$125, female \$75; Southdown male \$100, female \$50; Hampshire male \$250, female \$90; Lincoln male \$40, female \$25.

Most Economical Ration

Supplies Needed Protein

Farmers who are feeding calves and expect to market them in late spring or early summer should not overlook the fact that the most economical ration that can be fed is the one that supplies a liberal portion of protein. Corn, other grains, and most roughages are deficient in protein. The cheapest source of protein for cattle is cottonseed cake or meal. If no alfalfa or clover is fed, two pounds per head per day should be fed. If limited amounts of alfalfa or clover hay are available, one pound per head per day will be sufficient; if alfalfa is the only roughage fed, no cottonseed cake or meal will be necessary.

Bacteria Required for

Inoculating Bean Soil

Soil from an alfalfa field cannot be used to inoculate ground for beans. The bacteria which work on the beans are quite different from those which work on the roots of alfalfa. There is perhaps as much difference between the two as there would be between sheep and cows, to make a simple illustration. There are several classes of these bacteria which work on the roots of the legumes. All the different kinds of clover have much the same bacteria. The alfalfa bacteria are somewhat different, and also those of the bean or the cow pea. All these different bacteria have been separated and can be bought, safely packed in bottles, so that they can be used without great trouble.

Rotation Is Big Help

A definite rotation of crops is a farmer's most helpful friend. Such a system lowers cost per bushel or ton, distributes labor economically, incorporates humus in the soil, controls weed growth and eliminates risk from growing one crop.

Wonder Plant of Madagascar.
Refreshing liquid for the thirsty traveler in Madagascar, even in the driest seasons, is provided by the water from the surface of the banana-like leaves of a tree growing on the island, known as the traveler's plant. This same plant is otherwise useful in that the leaves are serviceable in house building as thatch, partition, and even in making walls. The hard, external cortex is stripped off, beaten flat, and used for flooring. The green leaves do duty also as wrapping paper, rain sheds, table cloths and dishes, and when folded properly as spoons or drinking vessels. The flowers of the plant inclose seeds that are edible, and yield an essential oil.

Voltaire's Scheme.

In France it is said that when Voltaire, who was of a frail appearance, reached the age of forty he had accumulated a fortune of \$400,000, but that this money was not earned from the sale of his books. The story is that he made most of it by lending money to needy noblemen. It would appear that the astute philosopher would lend an heir to an estate a large sum on condition that the heir should pay him 10 per cent interest on the amount as long as both of them lived. The heir would be neither required nor allowed to pay off the principal; and the agreement ended only when Voltaire died.

PHONOGRAPH RECORDS

A World Beater

By a fortunate purchase I have secured 200 pairs of Heavy, Doubled Stitched 220 Blue Bib Overalls. Full cut, high bib, plenty of pockets, suspender back, a regular \$2.00 Overall. While they last I will sell them at

\$1.50

No more after these are sold. Compare them with any in the city for \$2.00.

MACK PARRETT

Meaning of "Tao"

Authorities differ concerning the interpretation of the word "tao." Broadly speaking, it may be defined as the proper, the right road, a conduct of life designed to give the greatest individual happiness. Taoism is a system of philosophy whose greatest exponent was Lao-tse, who embodies his teachings in a book "Tao-teh-king," supposed to have been written shortly before he went into retirement. He taught that contemplation, reason, avoidance of force and disregard of mere ceremonies are the means of regeneration.

Now is the time to subscribe for the Union-Herald. We give \$16 in Aer-O-Plane Bonds for each \$1 paid on subscriptions to either Daily or Weekly.

RADIO

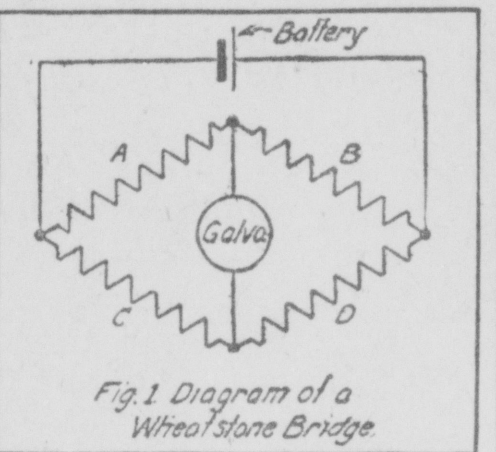

(Edited by G. Douglas Wardrop, Editor of Radio Merchandising)

By H. DE A. DONISTHORPE
A well known electrical balancing system is that known as the Wheatstone bridge. This well known principle can be applied beneficially to a radio amplifying circuit with excellent results.

In order to appreciate this particular form of circuit it will first be necessary to describe the Wheatstone bridge so that those who are not familiar with that piece of electrical apparatus may understand the action of this novel form of tube amplifier.

Fig. 1 illustrates the circuit of such a bridge, and consists of four resistances, A, B, C and D, connected across a single dry cell after the fashion shown. A sensitive current detecting device is joined in the circuit at the position indicated. Now if the product of the two resistances A and D are equal to that of B and C then no current will flow through the galvanometer and the resistance circuits may be said to be balanced. Such an

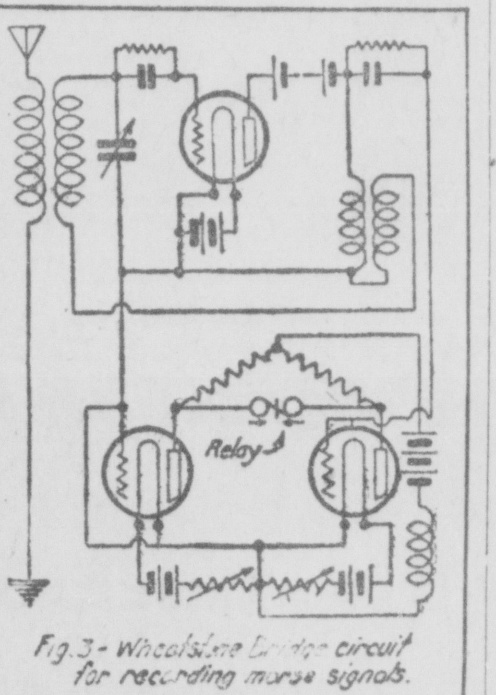

instrument is used for determining an unknown resistance. Suppose this resistance to be that inserted in the limb A, then this element is balanced with a known resistance, B, by varying the resistances, C and D, until there is no deflection shown by the galvanometer.

The Resistances.
The resistances C and D, when associated in a bridge for measuring purposes, generally consist of a single length of resistance wire of a known value with a sliding contact from the galvanometer, dividing it into the two separate units. The method of procedure is then to vary the position of the slider along the wire until the "balance" is indicated by a zero deflection.

Now when this simple principle is applied to a thermionic triode circuit it is the aim to produce a state of balance after the fashion described, one of the resistances being that of the internal resistance of a tube. A circuit showing such an arrangement is given in Fig. 2. This circuit will function admirably as an amplifier and at the same time does not possess that objectionable tendency to self-oscillate as is associated with some forms of audio frequency amplifiers.

It will be plainly seen by comparing this arrangement with the Wheatstone bridge that the tubes are connected in the several stages, taking the place of one of the limbs of the two bridges 1 and 2. It is important, therefore, that the resistances in the other limbs should correspond to that

of the internal resistance of the tubes employed, and this will be found to be of a value somewhere of the order of 30,000 ohms.

It will be noted that the filament circuit of each tube is provided with a variable resistance, and these are for the purpose of permitting a rough adjustment of the internal resistance of each tube to that of the other members of the respective bridges.

Action of the Circuit.
The action of the circuit is then quite simple if it be studied in connection with the balanced bridge principle, in that the variations of grid potential of the first tube bring about alterations in the filament anode current, reducing the internal resist-

ance of the tube. This will result in a flow of current from the "B" battery No. 1, bringing about an alteration of grid potential between the grid and filament of the second tube, establishing the usual thermionic amplifying effect in the anode circuit of that tube.

The circuit is highly ingenious and will reward the experimenter with excellent results for his efforts, but it is associated with the disadvantage of utilizing three "B" batteries and three filament resistances.

This Wheatstone bridge principle can be still further employed in a similar circuit for the recording of Morse signals. This particular arrangement is shown in Fig. 3, and is due to Doctor Alexanderson. Here the two tubes are connected in the opposite arms of the bridge corresponding to A and D of the circuit shown in Fig. 1. In this case the operation is somewhat different to that described in the pure amplifier. Here the variations of the grid potentials of the two valves cause increases in the currents flowing in the anode circuits of these tubes, which are equivalent as before to a decrease in the effective resistances of these triodes, and the balance of the bridge circuit is consequently upset.

Current Through Relay.
This defective balance allows a current to flow through the relay, which instrument is equivalent to the galvanometer of the Wheatstone bridge. In the other two limbs of the bridge are included two resistances, and as in the case of the aforementioned amplifier these are equal in value to that of the internal resistance of the tube.

The relay current from the relay can, of course, be made to work a Morse linker or other form of recording device, and with a little careful adjustment of the circuit some astonishing results can be easily obtained with these tubes.

To those who are interested in radio to an extent which reaches further than just broadcast reception the two circuits described will prove of interest, as they offer scope for further experimentation.—New York Sun.

What Amateurs Should
Know About Wire Work

Lead-in wires should be of copper, approved copper-clad steel or other metal which will not corrode excessively, and in no case should they be smaller than number 14 gauge. Antenna and counterpoise conductors and wires leading therefrom to ground switch, where attached to buildings, must be firmly mounted five inches clear of the surface of the building on nonabsorptive insulating supports, such as treated wood pins or brackets equipped with insulators having not less than five-inch creepage and airgap distance to inflammable or conducting material. Where desired, approved type insulators may be used.

In passing the antenna or counterpoise lead-in into the building, a tube or bushing of nonabsorptive insulating material should be installed so as to have a creepage and airgap distance of at least five inches to any extraneous body. If porcelain or other fragile material is used, it should be installed so as to be protected from mechanical injury.

A drilled window pane may be used in place of bushing, provided five-inch creepage and airgap distance is maintained.—Radio Digest.

Neutrodyne Connections
and Careful Soldering

When connecting up the neutrodyne the soldering should be done very carefully and under no consideration should acid be used as a soldering flux. The most desirable flux to use is a mixture of alcohol and resin. Some of the no-corrode soldering pastes on the market are permissible, if the joints are carefully cleaned immediately after soldering with alcohol or gasoline. Another very important point in soldering is to use a soldering copper that is hot enough. Cold soldering means high frequency resistance and poor mechanical strength in connections.

Howling

Ever experience howling between the stages of an audio frequency amplifier? If the transformers are placed too close together, magnetic leakage is caused by the escaping lines of force from the core into the air which passes from one transformer to the other and therefore destroys the electrical balance. As a result the circuits are placed in a state of unbalance, resulting in a series of screams and screeches in the phones or loud speaker.

Atmospheric Conditions
Warn of Foul Weather

Sometimes when the air is extraordinarily clear and distant objects are visible with unusual sharpness and sounds come from afar with startling distinctness, it is a warning of foul weather. Then it is

When the peacock loudly bawls
Soon we'll have both rain and squalls.

Under these atmospheric conditions the songs and cries of birds sound loud to the ear. The barking of dogs, the howling of cattle, the whistles of locomotives, the honking of motor horns, come from far away, whence sounds are not commonly heard. To the eye the difference of visibility from the ordinary may be likened to the contrast between a view through a pane of ordinary window glass and that through one of plate glass. The reason is that during the occurrence of a warm southerly wind at a moderate height, a condition usually preceding a storm, a stratus cloud is likely to cut off the sun's heating from the ground and so prevent irregularities in heating and also to permit the surface air to remain cool. The result is a homogeneous lower atmosphere through which light and sound waves travel without local disturbance. The sound waves are further intensified at a distance from their source by a phenomenon very common on a quiet morning after a clear night when the air close to the surface is cooler than that a few hundred feet aloft. There is a concentration of the waves. In the warmer air at a moderate height the sound waves travel faster than in the lower colder air, so those that ascend are bent back to earth and combine with those that travel the normal straight course, thus intensifying the sound in the listener's ears.

Life, Money and Women

Half the trouble in life comes from too much joy.
Two women may agree, but miracles are never sure.

Matrimony is one way to end uncertainty.
Lend me a dollar and I will wish you had remained my friend.—Richmond Times-Dispatch.

A PROCLAMATION

Circleville has never failed to respond to any appeal on behalf of suffering humanity when the cause was worthy and the need urgent.

Wednesday, July 9, has been set aside as "Bundle Day" for the Near East Relief in Circleville.

On this day we are asked to give our used clothing, blankets, shoes and overcoats in order that some destitute refugee or orphan in the Near East may be kept warm next winter.

We are asked to take or send our bundle to one of the central receiving stations in order that the committee may be spared the expense of collecting individual bundles. The Bundle station will be located at the mayor's office and will be in charge of Mrs. A. J. Lyle and Mrs. E. S. Stephens.

With the exception of food there is no need greater than that of clothing. Winters in many parts of the Near East are similar to those in the northern United States and many of the refugees lack even the most miserable rags with which to clothe their bodies.

Therefore, I, as mayor of Circleville ask that our people respond to this appeal that comes to us from the Bible Lands for warm clothing and shoes.

Given under my hand and seal this 3d day of July, 1924.
(Signed)

GEO. M. FITZPATRICK,
Mayor.

RADIO

(Edited by G. Douglas Wardrop, Editor of Radio Merchandising)

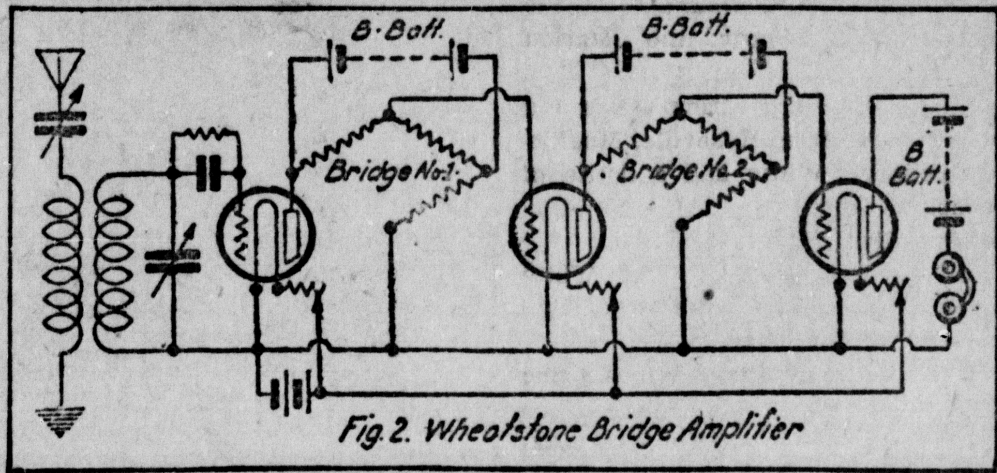

Fig. 2. Wheatstone Bridge Amplifier

By H. DE A. DONISTHORPE

A well known electrical balancing system is that known as the Wheatstone bridge. This well known principle can be applied beneficially to a radio amplifying circuit with excellent results.

In order to appreciate this particular form of circuit it will first be necessary to describe the Wheatstone bridge so that those who are not familiar with that piece of electrical apparatus may understand the action of this novel form of tube amplifier.

Fig. 1 illustrates the circuit of such a bridge, and consists of four resistances, A, B, C and D, connected across a single dry cell after the fashion shown. A sensitive current detecting device is joined in the circuit at the position indicated. Now if the product of the two resistances A and D are equal to that of B and C then no current will flow through the galvanometer and the resistance circuits may be said to be balanced. Such an

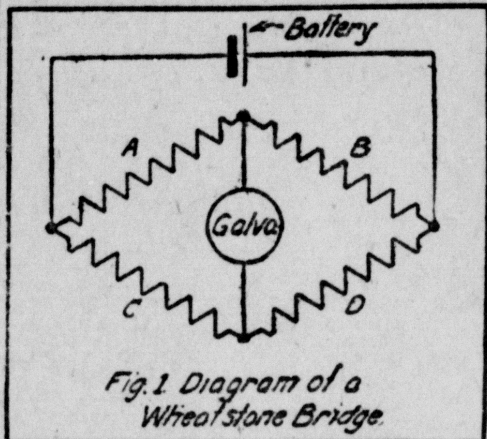

Fig. 1. Diagram of a Wheatstone Bridge

instrument is used for determining an unknown resistance. Suppose this resistance to be that inserted in the limb A, then this element is balanced with a known resistance, B, by varying the resistances, C and D, until there is no deflection shown by the galvanometer.

The Resistances.

The resistances C and D, when associated in a bridge for measuring purposes, generally consist of a single length of resistance wire of a known value with a sliding contact from the galvanometer, dividing it into the two separate units. The method of procedure is then to vary the position of the slider along the wire until the "balance" is indicated by a zero deflection.

Now when this simple principle is applied to a thermionic triode circuit it is the aim to produce a state of balance after the fashion described, one of the resistances being that of the internal resistance of a tube. A circuit showing such an arrangement is given in Fig. 2. This circuit will function admirably as an amplifier and at the same time does not possess that objectionable tendency to self-oscillate as is associated with some forms of audio frequency amplifiers.

It will be plainly seen by comparing this arrangement with the Wheatstone bridge that the tubes are connected in the several stages, taking the place of one of the limbs of the two bridges 1 and 2. It is important, therefore, that the resistances in the other limbs should correspond to that

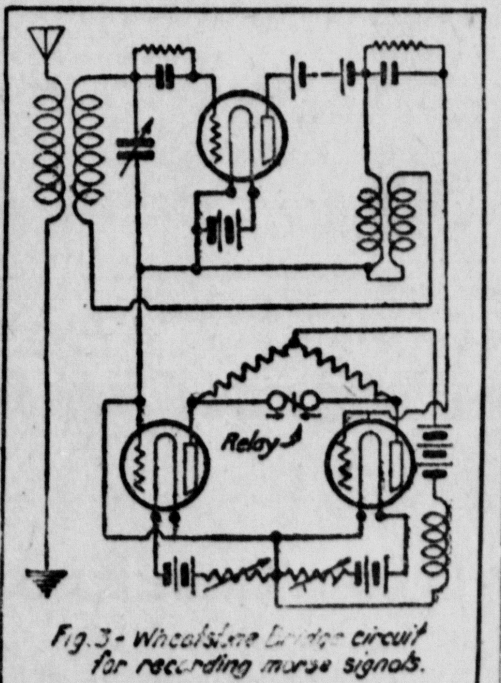

Fig. 3. Wheatstone Bridge circuit for recording Morse signals.

of the internal resistance of the tubes employed, and this will be found to be of a value somewhere of the order of 80,000 ohms.

It will be noted that the filament circuit of each tube is provided with a variable resistance, and these are for the purpose of permitting a rough adjustment of the internal resistance of each tube to that of the other members of the respective bridges.

Action of the Circuit.

The action of the circuit is then quite simple if it be studied in connection with the balanced bridge principle, in that the variations of grid potential of the first tube bring about alterations in the filament anode current, reducing the internal resist-

ance of the tube. This will result in a flow of current from the "B" battery No. 1, bringing about an alteration of grid potential between the grid and filament of the second tube, establishing the usual thermionic amplifying effect in the anode circuit of that tube.

The circuit is highly ingenious and will reward the experimenter with excellent results for his efforts, but it is associated with the disadvantage of utilizing three "B" batteries and three filament resistances.

This Wheatstone bridge principle can be still further employed in a similar circuit for the recording of Morse signals. This particular arrangement is shown in Fig. 3, and is due to Doctor Alexanderson. Here the two tubes are connected in the opposite arms of the bridge corresponding to A and D of the circuit shown in Fig. 1. In this case the operation is somewhat different to that described in the pure amplifier. Here the variations of the grid potentials of the two valves cause increases in the currents flowing in the anode circuits of these tubes, which are equivalent as before to a decrease in the effective resistances of these triodes, and the balance of the bridge circuit is consequently upset.

Current Through Relay.

This defective balance allows a current to flow through the relay, which instrument is equivalent to the galvanometer of the Wheatstone bridge. In the other two limbs of the bridge are included two resistances, and as in the case of the aforementioned amplifier these are equal in value to that of the internal resistance of the tube.

The relay current from the relay can, of course, be made to work a Morse inker or other form of recording device, and with a little careful adjustment of the circuit some astonishing results can be easily obtained with these tubes.

To those who are interested in radio to an extent which reaches further than just broadcast reception the two circuits described will prove of interest, as they offer scope for further experimentation.—New York Sun.

GET YOUR BONDS.

For each dollar paid on subscription to the Daily or Weekly Union-Herald, we give \$16 in Aer-O-Plane bonds.

PARTY AT ELKS CLUB

All Kinds of Games at Afternoon Party. July 10.

The Circleville Benevolent association will give an afternoon party at the Elks club house on Thursday afternoon, July 10, from 2:30 to 5 o'clock.

Bridge, whist, Mah Jongg and other games desired will be the afternoon's entertainment. Fifty cents will be charged each player, thus making every table two dollars. The association extends a very cordial invitation to all the ladies of our city to enjoy the party with us, and ask to see and enjoy the privilege of the Elks new club house.

Make up a table of four of your friends and telephone any one of the committee before next Thursday. It will be necessary to know how many are expecting to come.

Mrs. D. V. Courtright

Miss Sadie Brunner

Miss Mary Marfield

Executive Committee.

Now is the time to subscribe for the Union-Herald. We give \$16 in Aer-O-Plane Bonds for each \$1 paid on subscriptions to either Daily or Weekly.

POPULAR LOANS

\$25 to \$500

On your own security. No endorsers required. Convenient private offices. Friendly and obliging management. Over 25,000 loans amounting to nearly \$5,000,000 is our record since 1913. Resources over \$1,350,000. Concentrate your debts and bills in one place. Use our money. A safe place to borrow. City Loan service is popular, helpful, convenient, reliable and safe as a bank account in times of need. Open every day.

Elephant Buries Master He Killed During Rage

An elephant, which was one of the finest in Ceylon and was known throughout the whole island, was wild at a kraal and ran amuck for several days. No one could approach him. His mahout finally hit upon the idea of curing him by frightening him. He covered himself with a black cloth and approached the maddened elephant in this disguise. Unhappily he had reckoned without his host. The beast was not frightened, but seized the mahout and killed him. However, when men rushed up to rescue the corpse, and the black cloth was withdrawn from the mahout's face, the elephant, recognizing the familiar countenance, underwent a marvelous transformation. Suddenly becoming perfectly calm, he approached the corpse, stroked it with his trunk, and emitted a peculiar whimpering and sobbing sound.

Then the elephant dug a great hole in the ground with his feet, pushed the corpse into it and covered it with twigs and branches which he tore from the nearest trees. During all this time he kept up his peculiar whimpering noise. After this was done he let himself be led away quietly.

The story may sound incredible, but many others besides myself witnessed the incident—it is absolutely true and known throughout Ceylon.—Memoirs of John Hagenbeck, Wild Animal Dealer, Summarized for the Neue Presse (Vienna).

Magician of Africa Is Respected by Natives

In nearly every district in South Africa there is generally some old native who is a descendant of former witch doctors, to whom the surrounding natives go for advice. He is the "thrower of bones." And it is an instance of the childlike faith and simplicity of the natives that they firmly believe in the magic of this man.

He is usually a very old man, with teeth black from smoking "dagga" (a kind of hemp), a face all lines and wrinkles, and eyes that are coppered with the pale blue film of great age. He wears bangles and charms and strips of lizard's skin on his arms and wrists and always the same old colored blanket with jackal's tails on the border.

The natives from far and near consult him on many matters—causes of sickness, death and loss of stock. And his fee may be a fowl or a sheep or half a bag of grain or even in some cases a heifer.—Detroit News.

A Doctor's Life

The doctor sent a bill for \$10 to the terrible tempered Mr. Bangs. The bill read, "Two visits—\$10."

"You're a robber," said Mr. Bangs. "Five dollars a visit! It isn't worth it."

"I'll rewrite the bill," said the doctor, and Bangs smiled. They couldn't put anything like that over on him.

Then the doctor wrote: "To getting out of bed at 2 a. m., answering phone, disturbing my wife, dressing, going to garage, cranking 'tin Lizzie,' two-mile drive in the cold, saving baby's life, return to garage, waking wife, undressing, getting back into bed—\$10."

He said to Bangs: "I won't make any charge for the second visit, and you need not pay for the first unless you feel I have earned the money."

Mr. Bangs paid the bill.

By Compressed Air

Nowadays, in sinking caissons for bridges over certain rivers it is possible to make compressed air do the work of shovels in removing the sand, through a thick stratum of which, in some cases, the caisson is forced down toward the bedrock deep beneath. The sand is sometimes so pure and loose that the force of the compressed air supplied for the workmen in the caisson suffices to drive it up through blowpipes inserted in the caisson for the purpose. Jets of water are directed against the sand around the bottom of the blowpipes, and when thus dislodged the sand readily passes up through the pipes with the strong air currents that are continually pouring into them from the compressed atmosphere of the caisson.

Portraits of Shakespeare

Two portraits of Shakespeare are sufficiently diverse to add piquancy to the problem, "What did Shakespeare really look like?" The painting called the Felton portrait, first discovered in a broker's shop in the Minorities in 1788, by "a gentleman of fashion," shows him beardless except for a slight tuft of hair under the lower lip and a small fair mustache. The Lumley portrait, which was originally in possession of Lord Lumley, a contemporary of the poet's, is more in keeping with the generally accepted fancy of Shakespeare's appearance. He is shown with a florid complexion, a close-cropped beard and small brown mustache.

Of Course Not

Evelyn—Harold, the diamond in my engagement ring has a flaw in it.
Harold—Don't bother about it, dear. Love should be blind.
Evelyn—I know, Harold, but not love blind.

The Higher the Fewer

Conversation between husbands when wages for wives take effect:
"What do you pay your wife?"
"A hundred dollars a month, but you've no idea how hard it is to keep a good one."

SUCCESSFUL HOMECOMING

Two Thousand People Enjoy Fourth
at Commercial Point.

Addresses Were Made by Rev. Zeigler and Scott Wehe, of Columbus—Extensive Parade Was Pleasing Feature of Meeting—Will be Annual Affair.

Commercial Point and Scioto township celebrated the Fourth of July in a most pleasing manner when upwards of two thousand people assembled on the beautiful grounds of the centralized school and were splendidly entertained with addresses suitable to the occasion and with music by the Ashville band.

The addresses were made by Rev. Mr. Zeigler, of Commercial Point and Mr. Scott Wehe, a councilman of the city of Columbus. Both talks were highly appreciated by the large audience and especial interest attached to the address of Mr. Wehe, a native of the village, who has gone out into the larger world and has made good.

Preceding the exercises at the school grounds there was an extensive parade over all the streets of the village. In the procession were Sunday school boys and girls dressed in patriotic costumes. These were on decorated trucks and there were many other trucks in line beautifully bedecked with the national colors and flowers.

Uncle Sam rode on horseback, accompanied by a hardy pioneer, dressed in the costume of the early days. In a dilapidated, old express wagon was an old man driver and his passengers were three old ladies in costumes over one hundred years old.

There were many clowns on horseback and Spark Plug was represented by Master Thrailkill and he was accompanied by six boys on ponies and all were gaily decorated in the red-white and blue.

Each business house was represented in the parade with a handsome float and the Beckett & Dountz garage of Ashville, contributed a beautiful float.

When the procession reached the school grounds, the marchers were met by an American Indian.

One of the striking features of the parade was the showing made by Undertaker A. J. Hott. The first was a handmade coffin of the vintage of 1824 on a sled drawn by a mule. This was followed by the motor funeral equipment of 1924.

Sports indulged in were a baseball game, horseshoe pitching, tennis, etc. In the evening there was music by the band and a good display of fireworks.

The occasion altogether was so enjoyable that it was unanimously decided to make it an annual affair.

WET REFERENDUM

Saskatchewan to Vote on Change From Dry to Dispensaries.

Regina, Saskatchewan, July 7.—Whether Saskatchewan province will follow Quebec, Alberta, Manitoba and British Columbia in turning to government sale in dealing with liquor will be decided by the voters in a provincial referendum July 16. Saskatchewan has been dry since 1916. When the province was made dry and when it was kept so, women voted, as they will July 16. Quebec has never been dry, but adopted government sale to meet criticisms of the liquor traffic. Alberta, Manitoba and British Columbia adopted the dispensary plan after trying "bone dry" prohibition.

Ford Field For Aviators.

Detroit, July 7.—Announcement is made by Henry and Edsel Ford that a commercial landing field three-quarters of a mile square adjoining the new administration building of the Ford Motor company in Dearborn, will be established for aircraft. It is stated that the field is being furnished "as a civic development and a national patriotic move, there being no intention on the part of the Ford Motor company to go into the airplane business, other than to watch its development."

Mellon Off For Europe.

New York, July 7.—Andrew W. Mellon, secretary of the treasury, his daughter, Ailsa, and a party of friends left for Cherbourg on the Olympic. Mr. Mellon is going for a vacation in England and Scotland, returning Aug. 26.

President's Son Ill.

Washington, July 7.—Calvin Coolidge, Jr., 16, son of President Coolidge, is in Walter Reed hospital, where he underwent an operation on account of septic poisoning. His condition is considered critical.

Lost In Steamer Fire.

Baltimore, July 7.—Ten lives were lost by the burning of the bay steamer Three Rivers, en route from Crisfield, Md., to Baltimore. Five of them were members of the Baltimore Sun's Newsboy band.

ASLEEP AT SWITCH

W. H. Koontz Fined \$100 for Possession of Intoxicants.

Sheriff Young Saturday afternoon, accompanied by Deputy Howard S. Irwin, brought in a Bacchanalian party asleep at the switch in an auto on the Lancaster pike near the Marion Brothers nursery. In the party was W. H. Koontz and Charles White and another party from Roseville, Muskingum county. White had a bottle of moonshine distilled in the Fairfield county hills. Koontz was the driver of the car and both he and White were fast asleep when the officers came up. They were taken before Justice Frieze, who gave White a fine of \$100 and costs on the charge of possession and Koontz \$10 fine and costs for being intoxicated.

GONE TO CANADA.

Mr. and Mrs. W. E. Wallace, the manufacturers of Cream Crum bread have left the city for a week's stay in Canada. They are attending the Ohio State Bakers' association convention which is holding meetings at Ft. Stanley and London, Ontario, Canada.

"The Store That Treats You Right"

Here's How
We Sell Shirts
And Why---

When a man comes into this store for a shirt --we dont look ahead at the 25 per cent profit we are going to make on the sale --

We look at where the shirt is going and the people it and its wearer are going to meet and then we try to give that man more comfort for his body--more beauty for his appearance and more shirt for his money than any other store it this wide world.

To do this we must first have the shirts--AND WE HAVE.

By doing this we feel that we deserve the business.

We are getting just what we deserve.
